### Risk Rating & Required Action:

| 4A | Stop work. The risk is intolerable, minate the hazard redesign the activity before proceeding. A Safe Work |
|----|--|
|    | Method Statement (SWMS) or hit er-level authorisation is required.   |
| 3H | Review and approve additional controls to the last arts. Senior supervisor sign-off needed.                |
| 2M | Ensure all nominated controls are in prace and efficiency roceed with caution; monitor conditions.         |
| 1L | Proceed, following standard operating procedures. Monitor and keep records.                                |

### **Consequence Scale:**

| Consequence   | People (injury/illness)                     | Project / Assets   | Compliance / Reputation                                  |
|---------------|---|--------------------|--|
| Catastrophic  | Fatality or permanent total disability      | project shutdown   | Significant regulator intervention; criminal prosecution |
| Major         | Serious injury/illness (hospital > 5 days)  | critical delay     | Improvement notice; major media coverage                 |
| ivioderate    | Medical-treatment injury; lost-time > 1 day | moderate delay     | Minor breach; adverse client comment                     |
| Minor         | First-aid only, no lost time                | negligible delay   | Isolated non-conformance                                 |
| Insignificant | No injury                                   | no schedule impact | Deviation caught and corrected on site                   |

#### Notes on Hierarchy of Controls:

Remember to apply controls in the preferred order shown by the coloured pyramid:

- 1. Eliminate
- Substitute
- Isolate
- 4. Engineering
- 5. Administrative
- 6. PPE

Always document **why** a lower-order control is accepted if elimination or substitution is not reasonably practicable.

aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

| JOB STEP                 | POTENTIAL HAZARDS   | IR              | CONTROL MEASURES   | RR               |
|--------------------------|---|-----------------|--|------------------|
| SPECIFIC WORK STEPS      | HAZARDS THAT MAY ARISE  | INITIAL<br>RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS   | RESIDUAL<br>RISK |
| 1. Preparation           | inadequate personal protective equipment (PPE), untrained personnel | 3H              | - Conduct WHS induction for all involved personnel  - Ensure all personnel are equipped with approximate PPE  - Verify qualifications and training records well workers  - Check availability of safety equipment and to  - Organise first aid facilities and trained first aid on er presence  - Establish emergency procedures and ensure all workers are briefed  - Review job safety analyse (JSA) pocuments  - Ensure allown members inderstate the same of work  - Implement a weldy system for safety works  - Consider pre-considerement safety briefing | 2M               |
| 2. Site Inspection       | tripping hazards, unstable face                                     | 31              | - Clear bork at a of all unecessary materials and rubbish  Uses and to indicate danger areas  Theck ground stability and correct any uneven surfaces  Implement barriers to section off the work area  Regularly inspect site for new hazards  Use floor coverings or mats where necessary  Have a clear SOP (Standard Operating Procedure) for site inspection  Conduct daily refresher meetings on hazard identification  Assign a safety officer to regularly inspect the site  | 2M               |
| 3. Delivery of Materials | equipment falling, manual handling injuries                         | 4A              | - Conduct a risk assessment before unloading - Use mechanical aids for handling heavy materials - Ensure all delivery personnel are trained in handling heavy goods - Designate a specific area for deliveries away from main work area - Provide clear access pathways for delivery vehicles - Supervise all loading and unloading activities - Ensure proper lifting techniques are used - Develop a delivery checklist for safety compliance  | 2M               |

| JOB STEP                | POTENTIAL HAZARDS                                  | IR              | CONTROL MEASURES   | RR               |
|-------------------------|--|-----------------|--|------------------|

| 15. Emergency<br>Preparedness | poor emergency response, lack of communication        | 3H              |  | 1L               |

#### **EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES**

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
