

Service Replace Broken Wc Pan and Cistern Risk Assessment

Business Name:	ABN:	
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.	
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard	
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard	
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change	
								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site				
								<i>aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.</i>	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Trips and falls, Strains from lifting	3H	<ul style="list-style-type: none"> - Conduct a site assessment to identify potential trip hazards - Use appropriate lifting techniques and aids - Ensure adequate lighting in the work area - Clear the area of any obstacles before starting work - Use personal protective equipment such as gloves and safety boots - Have first aid kit readily available - Confirm all necessary tools and equipment are on hand - Check for any existing damage or hazards in the work area - Plan for emergency evacuation if necessary - Ensure communication devices are functioning 	2M
2. Isolate Water Supply	Water leakage, Inadequate isolation of water supply	3H	<ul style="list-style-type: none"> - Locate the main water valve and shut it off before work begins - Clearly label the isolation point to prevent accidental opening - Communicate with all team members about the isolation location - Use tools and equipment specifically designed for valve operation - Check the valve is fully closed before proceeding - Verify secondary isolation is in place - Regularly inspect for any leakage during task - Document isolation process for reference - Use absorbent materials to handle minor leaks - Ensure easy access to the isolation point for quick shutoff 	1L
3. Removal of Broken WC Pan	Sharp edges causing cuts, Manual handling injuries	4A	<ul style="list-style-type: none"> - Use appropriate gloves to handle sharp materials - Ensure broken pieces are carefully collected and disposed in a secure container - Break down large pieces for safer handling where possible - Implement buddy system for removing heavier items - Position feet and body to avoid strain during lifting - Secure a clear pathway for removal - Use mechanical aids such as trolleys for transportation - Avoid abrupt movements to prevent injury 	2M
