								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slippery surfaces, biological hazards	3H	<ul style="list-style-type: none"> - Conduct a pre-start meeting to discuss the task - Implement site-specific hazard identification - Ensure personal protective equipment (PPE) is worn - Clear the work area of any obstructions - Use non-slip footwear - Review relevant safety data sheets for chemicals - Verify all necessary equipment is available and functional - Ensure access to handwashing facilities - Install warning signs around the area - Provide first aid kit nearby 	2M
2. Site Inspection	confined spaces, fall hazards	4H	<ul style="list-style-type: none"> - Conduct a site walkthrough to identify hazards - Ensure area has adequate ventilation - Conduct Job Safety Analysis (JSA) - Use safety harnesses if required - Verify ladder stability and integrity - Post signs indicating confined space - Remove or isolate any identified hazards - Ensure spotter is present - Use fall protection systems as needed - Establish communication procedures 	2M
3. Equipment Check	faulty tools, electrical hazards	3H	<ul style="list-style-type: none"> - Inspect all equipment for damage - Test electrical tools for function - Ensure tools are correctly rated for environment - Use Portable Appliance Test tags - Confirm all guards and safety devices are in place - Replace or repair faulty equipment - Conduct regular maintenance - Ensure operatives are trained in equipment use 	1L
