

Snow Clearance From Pathways Risk Assessment

Business Name:		ABN:
Business Address:		
Contact Person:	Phone:	Email:

THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HIERARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records.	Administrative Change

Risk Rating & Required Action:

4A	Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.
3H	Review and approve additional controls before task starts. Senior supervisor sign-off needed.
2M	Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.
1L	Proceed, following standard operating procedures. Monitor and keep records.

Consequence Scale:

Consequence	People (injury/illness)	Project / Assets	Compliance / Reputation
Catastrophic	Fatality or permanent total disability	project shutdown	Significant regulator intervention; criminal prosecution
Major	Serious injury/illness (hospital > 5 days)	critical delay	Improvement notice; major media coverage
Moderate	Medical-treatment injury; lost-time > 1 day	moderate delay	Minor breach; adverse client comment
Minor	First-aid only, no lost time	negligible delay	Isolated non-conformance
Insignificant	No injury	no schedule impact	Deviation caught and corrected on site

Notes on Hierarchy of Controls:

Remember to apply controls in the preferred order shown by the coloured pyramid:

1. **Eliminate**
2. **Substitute**
3. **Isolate**
4. **Engineering**
5. **Administrative**
6. **PPE**

Always document **why** a lower-order control is accepted if elimination or substitution is not reasonably practicable.

aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slippery surface, Inadequate equipment	3H	<ul style="list-style-type: none"> - Conduct a pre-task briefing to ensure all workers are aware of the task and hazards. - Verify that all snow clearance equipment is in good working order. - Ensure all workers are wearing appropriate personal protective equipment (PPE), including non-slip boots and gloves. - Assess the pathway for any uneven surfaces and mark them if needed. - Confirm weather conditions are stable enough to proceed safely. - Provide sufficient lighting for early morning or late evening tasks. - Ensure two-way communication devices are operational and available. - Check the availability of first aid kit and emergency contacts. - Designate clear paths and egress routes. - Develop a contingency plan for unexpected severe weather changes. 	2M
2. Clear Marking of Work Area	Unmarked work area, Collision with bystanders	3H	<ul style="list-style-type: none"> - Use clear and visible signage to indicate work zones. - Set up safety barriers around the work area to prevent pedestrian entry. - Assign a spotter to guide and warn team of approaching pedestrians. - Use high visibility protective clothing to make workers easily noticeable. - Coordinate with site management to ensure public notifications are distributed appropriately. - Limit the work area to prevent unnecessary public distraction. - Educate workers on communication signals for alerting each other. - Ensure all team members are constantly aware of their surroundings. - Implement procedures for effectively handling unauthorised access to the work area. - Maintain a clear emergency evacuation path in case of an incident. 	2M
3. Inspection of Equipment	Faulty tools, Unexpected equipment failure	3H	<ul style="list-style-type: none"> - Conduct daily inspections before work commences, checking for wear and damage. - Ensure only certified and competent personnel handle equipment inspections. - Maintain an updated equipment logbook for recording conditions and service history. - Implement regular maintenance schedules as per manufacturer specifications. - Use appropriate tools designed for snow clearance tasks to prevent strain and injuries. - Ensure backup tools are operational and available to prevent downtime. - Train workers on identifying signs of equipment failure during operation. - Follow the manufacturer's guidelines for usage and limitations. 	1L
