Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Electrical shock, Manual handling injuries	3H	<ul style="list-style-type: none"> - Conduct a safety briefing before beginning work - Ensure all workers have appropriate personal protective equipment (PPE) - Verify machine is disconnected from the electrical supply during setup - Use correct lifting techniques and equipment for handling heavy materials - Conduct visual inspection of the area for any trip hazards - Ensure that all team members are competent and trained - Provide adequate lighting and ventilation - Keep the work area clear of unnecessary personnel - Establish emergency procedures and communicate them to all staff - Display clear signage indicating the preparation area 	2M
2. Inspect Strapping Machine	Electrical malfunction, Exposure to moving parts	3H	<ul style="list-style-type: none"> - Ensure machine is off and disconnected from power before inspection - Follow lock out/tag out procedures - Train workers to identify faults and defects - Regular maintenance should be carried out by qualified personnel - Provide gloves and appropriate PPE during inspection - Use tools correctly for opening and closing guards - Install guards and barriers to contain moving parts - Keep the inspection area clean to prevent slip hazards - Conduct a thorough inspection checklist before use - Ensure all safety devices are functional and in place 	1L
3. Loading Material	Strain injuries, Falling objects	3H	<ul style="list-style-type: none"> - Implement mechanical aids for lifting materials - Train workers on proper loading techniques - Wear hard hats in areas with overhead loads - Secure loads properly when staging materials - Use two-person lifts when necessary - Keep area clear to prevent tripping - Stack materials safely to prevent collapse - Provide step stools or ladders for elevated areas 	2M

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
