THIS RISK ASSESSMENT IS APPROVED BY THE PCBU ON THIS PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a RISK ASSESSMENT is prepared before the proposed work starts.

								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Lack of communication, Equipment failure	3H	<ul style="list-style-type: none"> - Conduct briefing sessions with all workers - Check all equipment for functionality - Ensure the availability of communication devices - Verify workers' understanding of procedures - Prepare a comprehensive risk management plan - Assign roles and responsibilities clearly - Establish a communication protocol for emergencies - Ensure all personnel have undergone safety training - Confirm that equipment checks are documented - Identify and mark off zones 	2M
2. Site Survey	Unstable grounds, Obstacles and pathways	2H	<ul style="list-style-type: none"> - Conduct a thorough inspection of the site - Mark out any unstable areas - Clear pathways before surveying - Use appropriate signage to indicate hazards - Provide safety briefings focused on site-specific risks - Ensure use of Personal Protective Equipment (PPE) - Identify safe pathways and work zones - Document and review survey findings regularly - Assign experienced personnel to supervise - Establish a protocol for identifying new hazards 	1L
3. Planning and Design	Inadequate load assessment, Design errors	3H	<ul style="list-style-type: none"> - Engage qualified engineers for design validation - Use advanced software for load simulations - Regularly review design plans with team leaders - Establish a review protocol for all plans - Conduct a detailed load assessment - Incorporate redundancy in design for safety - Cross-verify design calculations - Consult with structural experts 	2M

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
