								PPE
Risk Rating & Required Action:						Notes on Hierarchy of Controls:		
4A	Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.					Remember to apply controls in the preferred order shown by the coloured pyramid:		
3H	Review and approve additional controls before the task starts. Senior supervisor sign-off needed.					1. Eliminate		
2M	Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.					2. Substitute		
1L	Proceed, following standard operating procedures. Monitor and keep records.					3. Isolate		
Consequence Scale:						4. Engineering		
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation			
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution			
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage			
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment			
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance			
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site			
						Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.
