								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slips, trips, falls, manual handling strain	3H	<ul style="list-style-type: none"> - Conduct a pre-task meeting to discuss tasks and identify hazards. - Use appropriate flooring or matting to prevent slips. - Ensure work area is free from clutter and tripping hazards. - Designate clear walkways with visible markings. - Provide training on manual handling techniques. - Ensure staff wear suitable, non-slip footwear. - Conduct a site inspection prior to starting. - Make use of mechanical aids for heavy lifting. - Educate staff on emergency procedures. - Review task-specific safety protocols with team. 	2M
2. Vehicle Inspection	vehicle malfunction, fire	3H	<ul style="list-style-type: none"> - Perform a visual inspection of the vehicle before operation. - Ensure regular vehicle maintenance and service schedules are followed. - Check fire extinguishers are installed and functional. - Inspect fuel tank and hoses for leaks or damage. - Ensure proper ventilation in the refuelling area. - Train staff on fire safety management and emergency response. - Review manufacturer's safety instructions. - Ensure no smoking signs are prominently displayed. - Conduct routine checks of fire suppression systems. - Implement a hot work permit system, if required. 	2M
3. Refuelling Area Setup	spillages, unauthorised access	3H	<ul style="list-style-type: none"> - Ensure spill kits are available and staff trained in their use. - Set up barriers and signage to control pedestrian movement. - Designate a refuelling zone with clear markings. - Use non-sparking tools for setup tasks. - Regularly inspect equipment for signs of wear and tear. - Post emergency contact information prominently. - Limit access to trained personnel only. - Conduct toolbox talks prior to setup. 	2M
