Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slips, trips	3H	<ul style="list-style-type: none"> - Conduct a site inspection to identify slippery surfaces - Use non-slip footwear - Clear walkways from obstacles - Ensure proper lighting in work area - Brief workers on specific site hazards - Provide training on hazard recognition - Establish clear communication rules - Install signage for hazardous areas - Schedule work during favourable weather conditions - Regularly monitor site conditions 	2M
2. Gathering Materials	manual handling injuries from lifting objects	3H	<ul style="list-style-type: none"> - Use correct lifting techniques and equipment - Implement team lifting for heavy items - Secure loose materials on transport equipment - Wear appropriate PPE including gloves and boots - Store materials at convenient heights - Ensure materials are stable and secure during transport - Use trolleys or mechanical aids where possible - Keep a tidy and organised storage area - Train workers in manual handling techniques - Conduct regular checks on material conditions 	2M
3. Ladder Setup	falls, instability	4A	<ul style="list-style-type: none"> - Select appropriate height and type of ladder for the task - Inspect ladder for defects before use - Ensure ladder is placed on stable, even ground - Use ladder at correct angle (1:4 ratio) - Secure ladder at top and bottom if possible - Avoid overreaching when on ladder - Maintain three points of contact at all times - Brief workers on correct ladder usage 	2M
