								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Site Inspection	Uneven surfaces, Obstructions	3H	<ul style="list-style-type: none"> - Conduct a pre-work site walkthrough to identify hazards - Mark and clear obstructions before beginning work - Implement use of signage to alert of uneven surfaces - Ensure communication with site personnel about risks - Use appropriate personal protective equipment (PPE) - Provide training on site-specific hazards - Implement a buddy system for work oversight - Develop a work management plan - Ensure work area is adequately lit - Use appropriate non-slip footwear 	2M
2. Material Handling	Manual handling injuries, Exposure to chemicals	3H	<ul style="list-style-type: none"> - Implement manual handling training for all personnel - Use mechanical aids where possible - Conduct risk assessment specific to hazardous materials handling - Apply proper lifting techniques - Provide adequate PPE, including gloves and masks - Store materials securely to prevent falling or rolling - Use clearly labelled containers for chemicals - Train personnel on Material Safety Data Sheet (MSDS) - Restrict access to chemical storage areas - Dispose of chemical waste correctly 	2M
3. Hot Work Permit	Fire outbreak, Unauthorized access	3H	<ul style="list-style-type: none"> - Obtain and review a hot work permit before commencing work - Provide fire watch personnel during hot work - Maintain clear access to firefighting equipment - Ensure all personnel are trained in fire response - Restrict access to unauthorized personnel - Establish and maintain communication protocols - Secure work area with barricades - Implement an emergency response plan 	2M
