Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Needs Assessment	Incorrect PPE type assessed, Underestimation of PPE need	3H	<ul style="list-style-type: none"> - Consultation with staff to determine specific PPE needs - Reviewing potential hazards associated with tasks - Seeking expert PPE advice for specialised tasks - Conducting a trial to determine PPE effectiveness - Regular review and adjustment of PPE needs assessments - Implementing feedback mechanisms after PPE trial - Monitoring changes in hazards or tasks impacting PPE needs - Documenting the assessment process and outcomes - Providing training on how to assess PPE needs - Encouraging worker input on PPE effectiveness 	2M
2. Sourcing PPE	Inadequate PPE standards, Delayed PPE procurement	3H	<ul style="list-style-type: none"> - Ensuring suppliers meet Australian PPE standards - Selecting PPE from reputable manufacturers - Establishing a procurement timeline with contingency plans - Ensuring PPE is available in sufficient quantities - Developing a PPE sourcing checklist - Including user size variations in PPE orders - Verifying PPE certifications and compliance - Reviewing supplier performance regularly - Maintaining an updated inventory of PPE - Engaging multiple suppliers for better supply reliability 	2M
3. Training Program Development	Inadequate training content, Poor learning outcomes	3H	<ul style="list-style-type: none"> - Involving experienced trainers in development - Aligning training with current legislation and standards - Ensuring the program covers all types of PPE used - Including practical exercises in the training - Reviewing training programs annually - Developing multimedia resources for diverse learners - Providing detailed instructions on PPE maintenance - Incorporating feedback from previous training sessions 	2M
