Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	lack of awareness, improper attire	3H	<ul style="list-style-type: none"> - Conduct a pre-training briefing session. - Provide necessary PPE including gloves and goggles. - Ensure participants sign an attendance sheet. - Check if all fire extinguishers are in working condition. - Review the locations and types of fire extinguishers available. - Emphasise the importance of the training. - Make sure the training area is clear of obstacles. - Assign a team member to document the proceedings. - Verify all safety signage is visible and legible. - Establish an emergency communication plan. 	2M
2. Introduction to Fire Extinguishers	misunderstanding equipment, lack of engagement	3H	<ul style="list-style-type: none"> - Demystify the types of fires and corresponding extinguishers. - Provide a detailed explanation of extinguisher parts. - Use visual aids to enhance understanding. - Engage with Q&A to ensure comprehension. - Distribute informational leaflets. - Clarify the PASS (Pull, Aim, Squeeze, and Sweep) technique. - Highlight the importance of correct usage. - Encourage active participation. - Reinforce training objectives. - Engage with visual examples or demonstrations. 	2M
3. Demonstration of Correct Usage	improper use of equipment, accidental discharge	4A	<ul style="list-style-type: none"> - Conduct hands-on demonstrations of equipment use. - Monitor for compliance with safety protocols. - Use mock setups for practice to prevent accidental discharge. - Install safety guards where feasible. - Instruct on maintaining a safe distance during operation. - Ensure extinguishers are properly charged and within validity period. - Address any unsafe behaviour immediately. - Provide a step-by-step usage guide. 	2M
