### Risk Rating & Required Action:

| 4A | Stop work. The risk is intolerable, minate the hazard redesign the activity before proceeding. A Safe Work |
|----|--|
|    | Method Statement (SWMS) or hit er-level authorisation is required.   |
| 3H | Review and approve additional controls to the last arts. Senior supervisor sign-off needed.                |
| 2M | Ensure all nominated controls are in prace and efficiency roceed with caution; monitor conditions.         |
| 1L | Proceed, following standard operating procedures. Monitor and keep records.                                |

### **Consequence Scale:**

| Consequence   | People (injury/illness)                     | Project / Assets   | Compliance / Reputation                                  |
|---------------|---|--------------------|--|
| Catastrophic  | Fatality or permanent total disability      | project shutdown   | Significant regulator intervention; criminal prosecution |
| Major         | Serious injury/illness (hospital > 5 days)  | critical delay     | Improvement notice; major media coverage                 |
| ivioderate    | Medical-treatment injury; lost-time > 1 day | moderate delay     | Minor breach; adverse client comment                     |
| Minor         | First-aid only, no lost time                | negligible delay   | Isolated non-conformance                                 |
| Insignificant | No injury                                   | no schedule impact | Deviation caught and corrected on site                   |

#### Notes on Hierarchy of Controls:

Remember to apply controls in the preferred order shown by the coloured pyramid:

- 1. Eliminate
- Substitute
- Isolate
- 4. Engineering
- 5. Administrative
- 6. PPE

Always document **why** a lower-order control is accepted if elimination or substitution is not reasonably practicable.

aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.

| JOB STEP                | POTENTIAL HAZARDS  | IR              | CONTROL MEASURES  | RR               |
|-------------------------|--|-----------------|---|------------------|
| SPECIFIC WORK STEPS     | HAZARDS THAT MAY ARISE   | INITIAL<br>RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS  | RESIDUAL<br>RISK |
| 1. Preparation          | improper planning leading to delays, failure to identify all hazards on site | 3H              | - Conduct a thorough site assessment prior to communicement  - Ensure all necessary permits are acquired  - Develop a detailed plan outlining each standof the process  - Communicate the plan clearly to all team member  - Schedule the work to avoid deak traffic periods  - Obtain weather forecasts to plan for adverse conductors  - Ensure availability or any cessal equipment and personnel  - Designated as and responsibilities or each dam member  - Review previous incidence and learnin  - Condition mergels approcedures are in place and understood  | 2M               |
| 2. Site Induction       | lack of hazard awareness complacency among new workers                       | 31              | <ul> <li>Condula a colorehea we site induction for all workers</li> <li>Lishlight special sisks associated with tree clearance near roadways</li> <li>Ensure the derstanding of emergency procedures</li> <li>Provide thorough briefing on the use of personal protective equipment (PPE)</li> <li>Conduct quizzes to ensure understanding</li> <li>Encourage questions and discussions</li> <li>Assign experienced mentors to new workers</li> <li>Regularly update induction content based on feedback</li> <li>Record attendance and comprehension</li> <li>Promote a culture of safety awareness</li> </ul> | 1L               |
| 3. Equipment Inspection | equipment failure, use of incorrect tools                                    | 3H              | - Perform routine inspections on all equipment before use  - Check that all equipment is certified and fit for purpose  - Ensure operators are trained and competent  - Replace or repair damaged or worn equipment immediately  - Maintain a log of inspections and actions taken  - Ensure all safety features on equipment are functional  - Review manufacturer's guidelines for use  - Conduct pre-start equipment safety checks   | 2M               |

#### **EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES**

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.
