								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Manual handling injuries, Slips, trips, and falls	3H	<ul style="list-style-type: none"> - Conduct a pre-start briefing on proper lifting techniques - Ensure all pathways are clear and dry - Wear appropriate PPE including gloves and non-slip shoes - Use mechanical aids for lifting heavy items - Ensure adequate lighting - Remove tripping hazards from the work area - Conduct a site walk to identify potential risks - Mark uneven surfaces with bright tape - Train workers on safe work procedures - Update the SWM for the specific task 	2M
2. Transporting Cladding to Site	Vehicles striking personnel, Material falling during transit	4H	<ul style="list-style-type: none"> - Use designated loading zones - Secure all materials with appropriate restraints - Conduct vehicle pre-journey inspections - Use spotters in high-traffic areas - Implement traffic management plans - Ensure all drivers have proper qualifications - Load and unload in designated areas only - Maintain clear visibility around vehicles - Ensure communication between loaders and drivers - Check load stability regularly during transit 	2M
3. Measuring for Cuts	Eye injuries, Incorrect measurements	3H	<ul style="list-style-type: none"> - Use protective eyewear - Verify measurements using standard measuring tools - Conduct training on measurement techniques - Double-check measurements before cutting - Apply markings with non-toxic markers - Use stable platforms for measurement tasks - Assign experienced personnel to measurement tasks - Regularly calibrate measurement tools 	1L
