Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slips, trips, inadequate training	3H	<ul style="list-style-type: none"> - Ensure all workers have received proper training on loading procedures - Clear the area of any debris that could cause slips or trips - Provide personal protective equipment (PPE) including non-slip boots - Use safety signage to alert workers of potential hazards - Conduct a pre-task briefing to discuss potential risks - Ensure lighting is adequate for full visibility - Use anti-slip matting in loading zone - Review safety documents with all personnel - Keep walkways clear and unobstructed - Verify all workers are competent in the task 	2M
2. Vehicle Inspection	mechanical failure, poor condition	3H	<ul style="list-style-type: none"> - Conduct a thorough vehicle inspection before loading - Check brakes, lights, and tyre condition - Verify that load restraint equipment is in good condition - Ensure the vehicle has a valid safety certificate - Maintain a regular vehicle maintenance schedule - Report any mechanical issues immediately - Keep a checklist for regular inspection tasks - Confirm operation of horn and reversing alarm - Check that mirrors are clean and adjusted - Ensure all indicators are operational 	1L
3. Positioning the Vehicle	collision, uneven ground	3H	<ul style="list-style-type: none"> - Ensure the ground is level and stable before positioning the vehicle - Use spotters to guide the driver during manoeuvres - Set barriers to separate vehicle paths from pedestrian walkways - Use reflective clothing for visibility - Conduct a site assessment for potential hazards before positioning - Implement vehicle exclusion zones where possible - Ensure adequate communication methods are in place - Make use of wheel chocks when stationary 	2M
