Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Slips, trips, Equipment malfunction	3H	<ul style="list-style-type: none"> - Conduct pre-inspection of work area for hazards - Ensure proper lighting in the workspace - Ensure all shearer components are in working condition - Update staff on equipment status and known issues - Maintain a tidy workspace to minimise trip hazards - Enforce mandatory training for all operators - Provide appropriate PPE: gloves, non-slip boots - Regularly inspect flooring and walking surfaces - Clearly mark and isolate wet areas - Use lockout/tagout procedures for malfunctioning equipment 	2M
2. Blade Setup	Cuts, Incorrect blade installation	4H	<ul style="list-style-type: none"> - Use cut-resistant gloves - Provide detailed installation instructions - Train operators on proper installation techniques - Inspect blades for damages before use - Have a supervisor check blade installation - Use visual guides to aid correct installation - Provide first aid equipment on site - Ensure quick access to emergency contact numbers - Keep unauthorized personnel away during blade setup - Regularly maintain and replace blades 	2M
3. Power On	Electric shock, Unexpected startup	4A	<ul style="list-style-type: none"> - Conduct electrical safety checks before powering on - Train workers on machine startup procedures - Ensure isolation devices are in place - Use high-visibility signs for active equipment - Implement a two-person verification system - Regularly maintain electrical components - Wear rubber-soled shoes - Have emergency shutdown procedures ready 	2M
