								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Inadequate training, Unfamiliarity with equipment	3H	<ul style="list-style-type: none"> - Provide training on tool use - Ensure competency assessment before use - Maintain up-to-date equipment manuals accessible to workers - Display clear operating instructions near work area - Assign only experienced staff for initial setup - Conduct regular refresher sessions - Use instructional videos for complex tasks - Ensure all workers can demonstrate correct safety procedures - Schedule practice sessions with supervision - Verify understanding through practical demonstrations 	2M
2. Tool Inspection	Tool defects, Incorrect tool use	3H	<ul style="list-style-type: none"> - Implement a checklist for inspection - Ensure regular maintenance of tools - Repair defective tools immediately - Use tools that comply with Australian Standards - Verify tool type against task requirements - Record inspection findings in a log - Report any defects to a supervisor immediately - Ensure availability of spare parts - Keep inspection tools like gauges and meters calibrated - Train staff to recognize signs of wear and damage 	2M
3. Work Area Setup	Cluttered workspace, Inadequate lighting	3H	<ul style="list-style-type: none"> - Declutter workspace before starting - Mark and segregate working and non-working areas - Install adequate overhead lighting - Use portable lights if necessary - Ensure all cables and wires are secure and taped down - Position tools and materials within easy reach - Clear pathways of obstructions - Conduct a walk-through to spot potential hazards 	2M
