						1L LOW	Monitor and keep records.	PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A		Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.						Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H		Review and approve additional controls before task starts. Senior supervisor sign-off needed.						1. Eliminate	
2M		Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.						2. Substitute	
1L		Proceed, following standard operating procedures. Monitor and keep records.						3. Isolate	
Consequence Scale:								4. Engineering	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation		5. Administrative		
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution		6. PPE		
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage		Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.		
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment		aligned with Safe Work Australia's Managing the risk of fatigue at work (2023) and ISO 45001:2018 clauses 6–8.		
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Lack of awareness, Inadequate equipment	3H	<ul style="list-style-type: none"> - Conduct a comprehensive risk assessment before initiation - Ensure all team members participate in safety briefing - Verify all equipment is well-maintained and functional - Confirm correct PPE is available and used correctly - Train workers on emergency procedures and equipment use - Obtain necessary permits and approvals - Post adequate signage in work areas - Establish clear communication protocols - Implement site access controls - Schedule work to minimize exposure during high train traffic periods 	2M
2. Site Inspection	Uneven terrain, Hidden obstructions	3H	<ul style="list-style-type: none"> - Conduct a thorough site walk to identify hazards - Use marked pathways and avoid restricted zones - Employ surveying tools to detect hidden obstructions - Incorporate buddy system for additional awareness - Utilize high-visibility safety gear - Document site conditions and identified hazards - Implement a communication plan for hazard reporting - Ensure first aid kits are accessible - Conduct a toolbox talk covering identified site risks - Standardise inspection procedures across teams 	1L
3. Access Setup	Unauthorized access, Inadequate security measures	3H	<ul style="list-style-type: none"> - Install temporary barriers and warning signs - Ensure surveillance cameras cover critical areas - Deploy security personnel if needed - Strictly control access points with designated personnel - Use ID badges and sign-in sheets for tracking access - Schedule access setup during low-activity periods - Collaborate with local authorities for enhanced monitoring - Clearly mark access paths 	1L
