1. Preparation	incorrect PPE, untrained personnel operation risk, manual handling injuries	ЗH	 Conduct pre-start meeting to discuss job scope and lentify roles. Verify all operators are trained and competence using water jetter. Conduct manual handling training session Inspect all personal protective equipment (Pue) for aditability. Ensure area is clear of debrit that could cause us s or trips Develop a clear communication plan with hand signals commend. Ensure all equipment is whin surface dates and functioning correctly. Use mechanical aids for ribual handling trans. Designate a surface around handling trans. Che wather continuous to ensure safe operations. 	2M
2. Site Inspection	unexpected site hazards, environmenta conditions change, consuctions	21	 Conductioning situations assessment prior to commencement. Institution prior conditions that could impact operation. Erectioning signs to alert bystanders of ongoing operations. Theck for underground services using as-built plans or GPR. Established barriers around the work area to prevent unauthorised entry. Carry out walk-through to assess for ground stability and obstructions. Confirm emergency response plan in place with exits clearly marked. Have communications equipment checked and ready. Ensure a clear path for emergency evacuation. Document any site-specific risks identified. 	2M
3. Equipment Setup	equipment failure, incorrect setup, exposure to moving parts	ЗН	 Calibrate equipment to manufacturer specifications. Verify pressure ratings and connections are adequate for task. Use lockout/tagout procedures to isolate energy sources during setup. Ensure equipment setup is conducted by qualified personnel. Inspect hoses and connections for wear or damage. Confirm guarding is in place on all moving equipment parts. Use only manufacturer approved accessories and extensions. Maintain communication between setup team and supervisor. 	2M
