Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	slips and trips, manual handling injuries	3H	<ul style="list-style-type: none"> - Conduct pre-operational checks of the water truck - Clear work area of unnecessary items to prevent trips - Use correct manual handling techniques - Provide training on equipment operation - Ensure all PPE is available and used correctly - Install warning signage in work areas - Designate clear pathways - Schedule regular breaks to reduce fatigue - Review safety procedures with workers before starting - Assign supervisor for oversight 	2M
2. Loading the Water Tank	falling from heights, crush injuries	4H	<ul style="list-style-type: none"> - Use designated access ladders with safety rails - Implement a fall protection plan - Restrict access to loading area during operation - Ensure ground crew are visible to the driver - Perform loading on stable, level ground - Train workers on safe loading practices - Regularly inspect and maintain ladders and platforms - Use spotters during loading - Communicate using radios or signals - Designate a safe loading zone 	2M
3. Transporting Water	vehicle collision, rollover	4A	<ul style="list-style-type: none"> - Conduct a route survey before departure - Use seatbelts at all times - Adhere to speed limits - Maintain a safe following distance - Check weather conditions prior to travel - Perform regular maintenance on vehicles - Ensure drivers are trained and licensed - Use GPS tracking for route monitoring 	2M
