								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Slippery surfaces, Improper lifting techniques	3H	<ul style="list-style-type: none"> - Ensure area is dry before carrying vacuum - Use correct lifting techniques when moving machine - Wear appropriate non-slip footwear - Conduct pre-operational checks of vacuum cleaner - Ensure operator is trained for use - Display 'Wet Floor' signs when appropriate - Verify electrical leads are intact - Plan workflow to minimise travel on wet surfaces - Implement buddy system for heavy lifting - Regular inspection cleaner for faults 	2M
2. Electrical Connection	Electric shock, Tripping on cords	4H	<ul style="list-style-type: none"> - Ensure vacuum is unplugged before connection - Use cord management systems - Avoid overloading electrical outlets - Provide training on plugging/unplugging safely - Maintain dry hands when connecting/disconnecting - Routinely check for cord damage - Use extension leads with safety features - Do not run cords through water - Ensure RCDs are installed - Secure cords to avoid trip hazards 	2M
3. Dry Vacuuming	Dust inhalation, Blockage of filters	3H	<ul style="list-style-type: none"> - Use HEPA filters to reduce airborne particles - Wear dust masks where necessary - Regularly clean and replace filters - Avoid using vacuum if asthma or allergies - Monitor dust container levels - Ensure adequate ventilation - Follow manufacturer's operating procedures - Train workers on correct nozzle use 	1L
