Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Inadequate PPE, Equipment malfunction	3H	<ul style="list-style-type: none"> - Ensure all personnel are equipped with heat-resistant PPE - Conduct equipment checks and maintenance before use - Display clear safety signage in all potential danger zones - Ensure fire extinguishers are readily accessible - Keep an emergency contact list visible for all workers - Provide training on emergency procedures - Test communication devices for functionality - Maintain a clean and organised work area - Review and understand all relevant safety data sheets - Implement a buddy system for additional safety 	2M
2. Transport of Materials	Spillage, Improper lifting techniques	3M	<ul style="list-style-type: none"> - Use mechanical aids for transporting heavy materials - Train workers on proper lifting techniques - Secure transported materials to prevent spillage - Provide spill kits and ensure they are accessible - Use clearly marked pathways for transporting materials - Designate a trained spotter to assist in moving materials - Minimise transport distance to reduce risks - Enforce a strict no-rush policy - Conduct regular checks on transport equipment - Ensure adequate lighting in transport areas 	2M
3. Setting up Equipment	Electric shock, Falling objects	4A	<ul style="list-style-type: none"> - Isolate power sources before equipment setup - Use insulated tools for electrical work - Install protective barriers around working areas - Use proper lifting gear for heavy equipment - Ensure equipment is properly anchored - Conduct a pre-use inspection of all setup tools - Keep non-essential personnel clear of setup area - Provide training on safe equipment setup 	3H
