								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Improper equipment selection, Inadequate training	3H	<ul style="list-style-type: none"> - Verify equipment suitability for specific tasks by consulting the operation manual - Provide comprehensive training on equipment usage - Ensure competency checks are completed before operation - Access and review safety data sheets for all materials involved - Develop a job safety analysis specific to equipment - Establish communication protocols for operation - Assign qualified personnel for supervision - Use only certified equipment - Ensure continuous monitoring during operation - Verify emergency procedures are in place and communicated 	2M
2. Equipment Inspection	Damaged components, Improper maintenance	3H	<ul style="list-style-type: none"> - Conduct thorough pre-start checks - Inspect for wear and tear on all parts - Ensure safety features are operational - Maintain a regular maintenance schedule - Use checklists to ensure thorough inspections - Document inspection outcomes and rectify issues - Verify no modifications have been made that affect safety - Ensure all guards are in place and functioning - Communicate and rectify any inspection issues immediately - Only authorised personnel to conduct inspections 	2M
3. Site Assessment	Uneven surfaces, Overhead obstacles	3H	<ul style="list-style-type: none"> - Conduct a walk-through to identify hazards - Use mapping tools to define work area boundaries - Ensure surfaces are stable and secure - Remove or mark any obstacles - Install warning signs where necessary - Coordinate with site management for hazard management - Conduct site induction for all workers - Implement traffic management plans 	2M
