								PPE	
Risk Rating & Required Action:								Notes on Hierarchy of Controls:	
4A Stop work. The risk is intolerable. Eliminate the hazard or redesign the activity before proceeding. A Safe Work Method Statement (SWMS) or higher-level authorisation is required.								Remember to apply controls in the preferred order shown by the coloured pyramid:	
3H Review and approve additional controls before task starts. Senior supervisor sign-off needed.								1. Eliminate	
2M Ensure all nominated controls are in place and effective. Proceed with caution; monitor conditions.								2. Substitute	
1L Proceed, following standard operating procedures. Monitor and keep records.								3. Isolate	
								4. Engineering	
								5. Administrative	
								6. PPE	
Consequence Scale:								Always document why a lower-order control is accepted if elimination or substitution is not reasonably practicable.	
Consequence	People (injury/illness)		Project / Assets		Compliance / Reputation				
Catastrophic	Fatality or permanent total disability		project shutdown		Significant regulator intervention; criminal prosecution				
Major	Serious injury/illness (hospital > 5 days)		critical delay		Improvement notice; major media coverage				
Moderate	Medical-treatment injury; lost-time > 1 day		moderate delay		Minor breach; adverse client comment				
Minor	First-aid only, no lost time		negligible delay		Isolated non-conformance				
Insignificant	No injury		no schedule impact		Deviation caught and corrected on site

1. Preparation	Slips and trips, Falling objects	3H	<ul style="list-style-type: none"> - Conduct a site inspection to identify potential hazards. - Remove any obstacles or debris from work area. - Ensure all workers are trained in the use of personal protective equipment (PPE). - Use signs or barriers to notify of overhead work. - Confirm that weather conditions pose no additional hazards. - Verify that no unauthorized personnel are in the vicinity of the operation. - Ensure first aid equipment is on site and accessible. - Workers to wear non-slip footwear. - Plan for safe access to and egress from the work area. - Communicate work plan to all team members. 	2M
2. Choosing the Equipment	Incorrect use of ladders, Improper scaffold setup	4H	<ul style="list-style-type: none"> - Select ladders or scaffolds appropriate for the task. - Inspect equipment for damage before use. - Ensure ladders comply with Australian standards. - Set up scaffolds on a stable surface and ensure they are level. - Use guardrails on scaffolds where applicable. - Avoid bare metal ladders in electrical areas. - Plan for use of fall arrest systems if needed. - Ensure scaffold components are properly connected. - Check weather conditions for appropriateness of equipment use. - Equip workers with fall protection training. 	2M
3. Inspecting the Work Area	Structural instability, Electrical hazards	4A	<ul style="list-style-type: none"> - Conduct a structural risk assessment before work. - Identify and mark all overhead power lines. - Ensure certified personnel inspect the site. - Use non-conductive equipment when near electricity. - Engage an electrician to de-energize lines if possible. - Mark hazardous areas clearly. - Verify roof or platform load capacity. - Ensure weather conditions do not compromise structure stability. 	2M
