THIS SAFE WORK METHOD	STATEMENT IS APPROX 0 BY	THE PC. OF TP' ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.		required to en that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	apliance the VMS activell as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS & MS MAY HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND C THIS SWMS	OMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in account with gislative requirements to first identify any site hazards, comparing those hazards and then to further take steps to either eliminate or continued hazard.			
If an incident or a near miss occurs, all work must sto, an alately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Sharp tools, trip hazards	2M	- Conduct a thorough risk assessment and carty briefing to identify potential hazards and appropriate control measures prior to commencing won. - Establish designated walkways and clearly in the cart rip hazards, such as cords or carpet rolls, to ensure workers are aware of the obstacles and to safely navirable the workspace. - Keep all sharp tools secured to toolboxes when many use and store them with protective guards or covers to prevent accidental inju. - Require all workers to weep proper type, such a steel-tood boots, gloves, and safety glasses, to minimise the large of injury was hand a gishal wools or walking near trip hazards. - Inspection and no stain that gregularly to usure they are in good working condition, meaning that all sharp edges a proper or are and functioning as intended. - Proving a quate uning to workers on the safe use, storage, and maintenance of sharp tools, as well as on no logic up and utigating trip hazards within the work environment. - Massign beetiful dividuals to monitor and enforce safety rules and control measures, as well as to assist in a arin, any iduitified trip hazards. - Keep a corkspace clean and well-organised throughout the day to minimise clutter and reduce the allhood of trip hazards occurring. - Inplement a system for tracking and reporting incidents so that any necessary adjustments to control measures can be made promptly to prevent future accidents or injuries. - Establish regular communication channels for workers to discuss safety concerns, raise awareness of potential hazards, and share best practices for maintaining a safe work environment. - Have an emergency response plan in place, detailing procedures for responding to injuries sustained from sharp tools or trip hazards, including first aid administration and reporting protocols. - Regularly review and update SWMS to reflect any changes in equipment, materials, or processes that may affect safety outcomes and ensure that all workers are up to date on current safety practices.	1L
2. Measuring area	Incorrect measurements, pinch points	2M	 Ensure all workers receive proper training in using measuring equipment, such as tape measures and laser devices, to minimise the risk of incorrect measurements. Reinforce strict adherence to the double-checking rule – all measurements must be confirmed by a second worker before proceeding with any work. Provide clear instructions to workers on how to use measuring tools accurately and consistently. Encourage frequent communication among team members during the measuring process, so any discrepancies can be quickly identified and resolved. Layout measurement marks using non-permanent methods (e.g., chalk or erasable markers) to prevent irreversible errors and allow for corrections if necessary. 	1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Utilise appropriate personal protective equipment (PPE) while handling tools and materials during the measuring process, including gloves to protect hands from potential pinch points.	
			- Regularly inspect all measuring tools and device ensure they are in good working order, free from defects, and provide accurate measurements	
			- Implement clear guidelines on how to sale, shold and record the measuring tapes to avoid injuries resulting from sharp edges, rapid retraction, or manual sistances.	
			- Prioritise workplace organisation and cleanline receping the rea free from clutter and obstructions that could hinder accurate me surements or cause hishaps	
			- Establish clear procedures for porting workplace nazards or incidents, encouraging a proactive approach towards procedure safety precautions and minimising future risks.	
			- Conduct recognized and so it is and so it is carpet laying SWMS to ensure that control measures remain effect, and relevation and upon the many when necessary to further minimise risks.	
	•		- Prop the ping: by the that all workers have received appropriate training in the use of cutting tools and handling on spets to pinimise the risk of cuts and exposure to airborne particles.	
			- Person Projective Exalpment (PPE): Provide suitable PPE, such as cut-resistant gloves and long eves in work is, as well as safety goggles or a face shield for protection against airborne particles.	
			- Too, at enance: Regularly inspect and maintain cutting tools to ensure they are sharp and functioning operly educe the risk of accidents during carpet cutting.	
			- fe work procedures: Establish standardised safe work procedures for cutting carpets, such as laying them out on a clean, flat surface with adequate lighting and ensuring there is enough space to accommodate the tools and workers involved.	
			- Dust collection: Implement dust collection systems or vacuum cleaners fitted with HEPA filters to minimise the amount of airborne particles generated during the carpet cutting process.	
3. Cutting carpet	Cuts, airborne particles	3H	- Ventilation: Increase ventilation within the workspace by using fans, opening windows, or installing air purifiers to help dissipate airborne particles more effectively.	2M
			- Workplace layout: Organise the work area to provide sufficient space for workers to move around safely without coming into contact with sharp tools, particularly while cutting carpets.	
			- Clear communication: Encourage clear communication between team members about their tasks and movements to prevent any surprises or accidental contact with cutting tools.	
			- First aid kit: Have a fully stocked first aid kit readily available onsite to deal with any potential cuts or injuries immediately.	
			- Breaks and rotations: Schedule regular breaks for workers to rest and recuperate, as fatigue can increase the likelihood of mistakes and accidents. Additionally, consider rotating workers between tasks to reduce the risk of repetitive strain injuries associated with carpet cutting.	
			- Waste management: Dispose of carpet offcuts and debris promptly to keep the work area clean and clutter-free, reducing the risk of tripping hazards or accidental contact with sharp objects.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
		•
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SWMS		
SWMS initial risk (IR) column as well as residual risk (RR) column pleted.		
Check control measures added to the SWMS are the most effective selective.		
Responsible person is assigned and listed on the part of the important of measures.		
Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc.		
SWMS identifies plant and equipment to be us		
Details of inspection checks required for any equipment listed a noted on the SWMS.		
Describes any mandatory qualifications, experience, or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
