THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PCL OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or under o (PC 1) is	required to en that a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	apliance the VMS a vell as review	es and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS S (MS M) HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONNI EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND CO	OMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accomposition with a gislative requirements to first identify any site hazards, and then to further take steps to either eliminate or continuous each hazard.			
If an incident or a near miss occurs, all work must sto, anately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Conduct a walk-through of the meeting argue ensure it is free from any unnecessary equipment or obstacles that may cause tripping.	
			- Clearly define and mark designated pathway participants safely to and from the meeting space	
			- Ensure all cables and cords properly secured dig ed with cable protectors to prevent them from becoming trip hearts.	
			- Provide appreatue train on the orrect user safety equipment before the meeting begins, ensuring everyone unestands how operate quipment safety.	
1. Preparation	Tripping over equipment, Incorrect use of safety equipment	2M	- Place ignage barrier around any cential hazards identified during preparation to alert workers and attended to their centre.	1L
			- Organ sementary space efficiently, keeping tables, chairs, and equipment arranged tidily to maximinally able space and minimise clutter.	
			Use not slip has or rugs in areas prone to spills or moisture to reduce the risk of slipping and tripping.	
			- Regular, inspect safety equipment for functionality and compliance with relevant standards to ensure it perate, rectly if needed.	
			- point a competent person to oversee the set-up of the meeting environment, ensuring all safety me, sures are implemented correctly and thoroughly.	
			- Develop an emergency response plan specifically for the meeting, including procedures for evacuating the area and providing first aid if a safety incident occurs.	
			- Conduct pre-meeting training sessions to ensure all participants understand the importance of safety meetings and their role in stress management.	
			- Develop a clear agenda prior to the meeting to keep discussions focused and prevent unnecessary stress from prolonged sessions.	
			- Assign a facilitator to guide the meeting, ensuring it stays on track and effectively communicates key points to all attendees.	
Conducting Initial Brief	Illness due to stress, Miscommunication leading to accidents	3H	- Encourage open communication and provide opportunities for employees to voice any concerns they might have regarding safety procedures or general workplace issues.	1L
			- Use visual aids like charts and diagrams to clearly communicate complex information, reducing the risk of miscommunication.	
			- Implement regular breaks during longer meetings to prevent fatigue and mental stress among participants.	
			- Provide stress management resources and support to employees who may feel overwhelmed by safety responsibilities or meeting content.	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Follow up all meetings with written summaries or notes that highlight discussed topics, conclusions reached, and actions agreed upon to reinforce key points and clarify any vague aspects.	
			- Allocate adequate time for questions and answer ensure everyone leaves with a clear understanding of safety protocols.	
			- Utilise multiple channels of communication including emply and internal bulletins, to disseminate important information discussed during the nating.	
			- Schedule safety meetings at times that are contributed for most employees to minimise additional stress from schedule conflicts.	
			- Conduct a thorough tion to be facility before beginning any activities, identifying potential slip and trip hazards sweats wet file is, unearly surface and obstructions in walkways.	
			- Install non-sumats or so laces in an one one to water or other slippery substances to reduce the risk of slippery.	
			- Clea h rk and minate all walkways, stairways, and emergency exits to prevent tripping incidents.	
			- Ensure all chines turned off and de-energised before the inspection begins to avoid unexpected activation	
			- appropriate gns and barriers to highlight ongoing inspections, particularly around hazardous areas when his land trips could occur.	
3. Facility Inspection	Slips and trips, Unexpected machinery activation	3,	mplement and regularly review a maintenance programme to keep floors and equipment in good cition, promptly addressing any issues such as leaks or damages that could lead to slips and trips.	2M
			Provide training to staff on recognising and managing risks associated with slips, trips, and unexpected machinery activation during facility inspections.	
			- Equip inspectors with personal protective equipment (PPE), such as non-slip footwear, to minimise the risk of injury from slips and trips.	
			- Develop and follow lockout/tagout procedures to ensure machinery cannot be activated unexpectedly during an inspection.	
			- Assign a trained supervisor to oversee the inspection process, ensuring adherence to safety protocols and immediate action if any hazards are identified.	
			- Establish a communication plan to ensure all employees are informed about ongoing inspections and any restricted areas to minimise unnecessary foot traffic and distractions.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS	
The company details have been entered, including the project name and address.			
All relevant personnel consulted during the development of the SWMS.			
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	7		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWMS			
SWMS initial risk (IR) column as well as residual risk (RR) column pleted.			
Check control measures added to the SWMS are the most effective selections			
Responsible person is assigned and listed on the part the important control measures.			
Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc.			
SWMS identifies plant and equipment to be us			
Details of inspection checks required for any equipment listed an inoted on the SWMS.			
Describes any mandatory qualifications, experience, and or skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
