THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PCL OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or under og (PC 1) is	required to en that a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	opliance the VMS a well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS S VMS MY HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONNI EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND COTHIS SWMS	OMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched and in account with a gislative requirements to first identify any site hazards, hazards and then to further take steps to either eliminate or continuous each hazard.			
If an incident or a near miss occurs, all work must sto, an alately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Exposure to bird droppings, injury from tools	ЗН	 Conduct a risk assessment to identify pote our hazards and determine appropriate controls prior to commencing work. Provide training to all workers on the risks as a risk of with bio-hazardous substances and safe handling procedures. Use personal protective equivalent (PPE) such as love oung sleeves, masks, goggles, and coveralls to prevent direct contrativith bine troppings. Ensure that Provide approach at elyoned, maintained, and replaced as necessary. Utilise tools in extende chandles to work affect contact and reduce the need to bend or come into close or ximity. The hard your analysis of the work area to prevent unauthorised access and minimise expose a lighters. Implement property or practices, including washing hands thoroughly with soap and water before eaks a did the end of the work period. Use list sable bags or containers for collecting and disposing of waste materials safely and in coorda, with local regulations. Insure adequate ventilation in enclosed spaces to minimise inhalation risks when handling or cleaning up and droppings. Provide clear signage in work areas to inform others of potential risks and required precautions. Store and maintain tools and equipment in clean condition to prevent contamination when not in use. Develop emergency procedures to address accidental exposure or spills, including first aid measures and reporting protocols. Ensure regular monitoring and review of the control measures in place to adjust strategies as needed based on new information or changes in work conditions. Engage a licensed pest control professional if the situation requires specialised equipment or chemicals beyond standard precautions. 	2M
2. Loading tools onto vehicle	Slip and fall, loading accidents	3Н	 Conduct a pre-task safety briefing to ensure everyone understands the procedure and associated risks. Wear appropriate personal protective equipment (PPE) such as gloves, safety boots with non-slip soles, and high-visibility vests. Inspect the loading area for any obstacles or uneven surfaces that may cause slips or trips, removing any hazards found. Use proper body mechanics and lifting techniques to avoid strain or injury when handling tools and equipment. Ensure all tools are securely packed in toolboxes or bags to prevent items from shifting during transport. 	2M

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
		1	- Use ramps or tail lifts if available to avoid manual lifting of heavy tools into vehicles.	1,11011
			- Position vehicles on flat and stable ground before loading to minimise the risk of tipping or instability.	
			- Load heavier tools first to create a stable baser use lighter items on top to maintain balance.	
			- Maintain clear communication among teat members during loading to coordinate efforts and avoid accidents.	
			- Clearly mark pathways and work zones using the sort ape to keep unauthorised personnel out of the loading area.	
			- Keep hands and fingers away com pinch points at least swhen placing items in the vehicle.	
			- Apply wheel chession continues to prevent unintended movement whilst loading tools.	
			- Regularly and tools and uipmen andition to ensure they are fit for use, replacing any worn or damaged item.	
			- Developed an employ response plan outlining steps to take in case of an accident or injury during the loading by less.	
			Ensure all very les are maintained and serviced regularly according to manufacturer guidelines to yent in echan. I failures that could lead to accidents.	
			Drive st hold a valid driver's licence appropriate for the vehicle being operated.	
			onduct pre-trip inspections, including checking tyre pressure, brakes, lights, and indicators, to ensure the rehicle is roadworthy.	
			Plan travel routes in advance, favouring less congested roads, and provide extra time to avoid rushing, which can reduce accident risk.	
			- Implement a fatigue management plan that enforces rest breaks in line with legal requirements to minimise the risk of accidents due to driver fatigue.	
	Vehicle accident, exposure to bio		- Equip each vehicle with a first aid kit and emergency supplies such as water, blankets, and a torch.	
3. Travelling to job site	hazardous substances	3H	- Provide training on safe driving techniques and emergency response procedures for incidents or accidents during travel.	2M
			- Carry personal protective equipment (PPE) such as disposable gloves, masks, and eyewear to protect against potential exposure when leaving the vehicle.	
			- Park vehicles in well-lit areas away from bird nesting sites to minimise direct contact with droppings upon arrival.	
			- Install suitable containment and cleaning materials in vehicles, such as plastic sheeting or bags, to safely manage any accidental contamination with bio-hazardous substances.	
			- Require personnel to sanitise hands with appropriate disinfectant before and after potential exposure when handling contaminated items or entering areas with bio-hazards.	
			- Develop communication protocols using mobile phones or radios to maintain regular check-ins with team members, ensuring assistance can be provided promptly if an emergency arises.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SWMS		
SWMS initial risk (IR) column as well as residual risk (RR) column pleted.		
Check control measures added to the SWMS are the most effective selections		
Responsible person is assigned and listed on the part the important control measures.		
Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc.		
SWMS identifies plant and equipment to be us		
Details of inspection checks required for any equipment listed an inoted on the SWMS.		
Describes any mandatory qualifications, experience, and or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
