| ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS MAN MANY ACTIVITY ON THIS MANY HAVE THE FOLLOWING COMMUNICATED | NALZ OF ALL RELEVANT PERSONNE EVELOPMENT AND APPROVAL OF | EL WHO HAVE BEEN CONSULTED AND CO THIS SWMS | DMMUNICATED TO IN THE |
| Safety meetings or toolbox talks will be sched and in account with egislative requirements to first identify any site hazards, so to compare hicas those hazards and then to further take steps to either eliminate or contact each hazard. | | | |
| If an incident or a near miss occurs, all work must stop an alately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. | | | |
| Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. | | | |
| The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident. | | | |

| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Trip hazards, inappropriate PPE | 2М | Conduct a walkthrough of the area to identification and remove any trip hazards such as loose mats or items on the floor. Clearly mark and secure all extension cords to prevent tripping. Ensure adequate lighting in the work area to encore visibility and reduce the risk of trips. Implement a regular cleaning the dule to ensure howeve clean and dry, particularly around the polishing station. Supply antient mats in a lot s that the prone togetting wet. Provide approxiate footbaar with slip constant soles to all employees involved in polishing duties. Trains of on same deskeeping practices to maintain a clutter-free environment. Allock as the constant stope for cutlery polishing tasks to avoid congestion and potential trips. Assess and provide access to ergonomic workstations and equipment to minimise movement and reach. Therefore, and damage, replacing any that is not in good condition. | 1L |
| 2. Cleaning Cutlery | Chemical exposure, skin irritation | 2М | Provide appropriate personal protective equipment (PPE) such as gloves and aprons to prevent skin irritation. Use non-toxic, environmentally friendly cleaning agents whenever possible to minimise chemical exposure. Ensure all chemical products are clearly labelled and stored securely according to safety guidelines. Conduct training sessions on the safe handling and usage of chemicals used in cutlery cleaning. Implement a clear hand-washing protocol before and after handling chemicals or cleaned cutlery. Install adequate ventilation systems to reduce inhalation risks associated with chemical fumes. Develop and display safety data sheets (SDS) for all cleaning chemicals used and ensure staff are familiar with them. Introduce spill containment procedures and materials to manage accidental chemical spills effectively. Regularly inspect and maintain PPE to ensure it is in good condition and fit for use. Establish an emergency procedure for incidents involving chemical exposure or allergic reactions. Rotate tasks among employees to limit prolonged exposure to cleaning chemicals. Encourage employees to report any skin irritation or health issues promptly to management for immediate action. | 1L |

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and gualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK N THE ST ATEM ANT MONITORING AND REVIEW

d must reviewed (and

hav be sted by the operation

should be carried out in

The SWMS must be reviewed regularly to make sure it remains fective revised if necessary) if relevant control measures are revised. The viewn consultation with workers (including contractors htractors Vb of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that persons involved with the work are advised that a revision has been made and how they can acces he revised SWMS, including all persons who will need to change a work procedure or system as a region of the review are advised of the changes in a way that will enable them to implement their duties antly with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies. followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS | |
|---|----------------|----------|--|
| | | | |
| The company details have been entered, including the project name and address. | | | |
| All relevant personnel consulted during the development of the SWMS. | | | |
| Name, signature, position and date signed of the person approving the SWMS. | | | |
| Specific personnel and qualifications, experience is noted in the SWMS. | | | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | | | |
| Adequate risk assessment of any identified hazards has been completed. | \boxtimes | | |
| Foreseeable hazards are identified and documented for each step. | \boxtimes | | |
| Any hazards listed in any site risk assessments have been added to the SWMs | \boxtimes | | |
| SWMS initial risk (IR) column as well as residual risk (RR) column mpleted. | \boxtimes | | |
| Check control measures added to the SWMS are the most effective selection | \boxtimes | | |
| Responsible person is assigned and listed on the property of the importation control measures. | \boxtimes | | |
| Permit or licenses requirements specified, su as Hot Work, Electric Work, Work at Heights etc. | \boxtimes | | |
| SWMS identifies plant and equipment to be use | \boxtimes | | |
| Details of inspection checks required for any equipment listed protection on the SWMS. | \boxtimes | | |
| Describes any mandatory qualifications, experience, and g or skills required to perform the work. | \boxtimes | | |
| Applicable personal protective equipment is selected on the SWMS. | \boxtimes | | |
| Reflects and documents any legislative references and/or Australian Standards. | \boxtimes | | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | \boxtimes | | |
