THIS SAFE WORK METHOD	STATEMENT IS APPROVIND BY		
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	ting a business or under the (PC + I) is	required to entry a that a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:	NK	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	voliance i the VMS a vell as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS MAN HAVE THE FOLLOWING COMMUNICATED	NALE OF ALL RELEVANT PERSONNE EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND CO THIS SWMS	DMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ad in account with egislative requirements to first identify any site hazards, such a company hica those hazards and then to further take steps to either eliminate or contract each hazard.			
If an incident or a near miss occurs, all work must stop an attended by Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Back strain from lifting, Cuts from sharp edges on drywall sheets, Inhalation of dust.	ЗН	<ul> <li>Use safety gloves to protect hands from show edges on drywall sheets.</li> <li>Implement proper lifting techniques to miniciple back usin, including bending at the knees and keeping the load close to the body.</li> <li>Conduct manual handling traning for all team in orders invested in cutting and lifting drywall sheets.</li> <li>Use mechanical aids such as tableys or lifts when the participation heavy drywall sheets to reduce manual handling.</li> <li>Wear respiratory protective equipment, like dramasks or respirators, to avoid inhaling drywall dust.</li> <li>Ensure adequate ventiler in in the work use to disperse dust particles and maintain air quality.</li> <li>Wetween the optime sheets slightly before cutting to reduce airborne dust generation.</li> <li>Estatisch relean-up protocol to promptly remove dust and debris from the workspace.</li> <li>Design te a brage as a for drywall sheets that allows easy access without the need to manoeuvre kward.</li> <li>Convect egular risk assessments to identify any additional hazards and adjust control measures coording.</li> </ul>	2М
2. Ensure proper lighting	Poor visibility, Tripping over materials/equipment.	ЗН	<ul> <li>Use high-quality LED work lights to ensure even and bright illumination of the workspace.</li> <li>Position lighting at different angles to avoid shadows and dark spots.</li> <li>Regularly inspect and maintain lighting equipment to prevent malfunctions.</li> <li>Install overhead lighting fixtures where possible for consistent coverage.</li> <li>Ensure portable lights are securely placed and not easily knocked over.</li> <li>Increase lighting levels in areas where precision cutting is required.</li> <li>Use rechargeable battery-operated lights to avoid trailing cables that can be a trip hazard.</li> <li>Clearly mark walkways and pathways with high-visibility tape or barriers.</li> <li>Maintain a clean and organised workspace by neatly stacking materials and securing loose items.</li> <li>Conduct regular housekeeping checks to ensure no tools or debris clutter passages.</li> <li>Provide training to workers on identifying and correcting poor lighting conditions.</li> <li>Ensure emergency lighting is available and operational in case of power outages.</li> <li>Adjust lighting promptly if it hinders safe vision or creates glare on surfaces.</li> </ul>	1L
3. Selection and inspection of tools	Faulty equipment, Inappropriate tool selection.	ЗН	- Conduct a pre-start inspection of all tools to ensure they are in good working condition.	2M

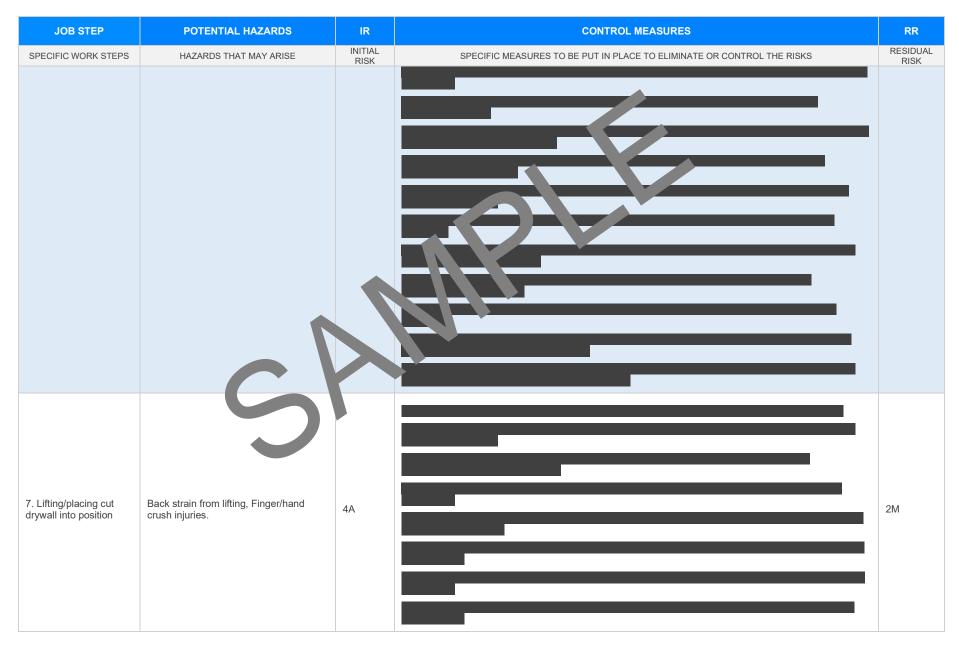

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Verify that electrical tools have been tested and tagged according to Australian standards.	
			- Choose tools specifically designed for cutting drywall to avoid overexertion and poor quality work.	
			- Ensure all tool guards and safety mechanisms in intact and operational prior to use.	
			- Provide training to workers on the property ection and unage of tools for drywall cutting tasks.	
			- Deploy a tool maintenance schedule to regularly characteristic and service equipment.	
			- Clearly label tools to prevent confusion and encourage appropriate use for specific tasks.	
			- Have spare tools available to oplace any that man econo defective during work.	
			- Perform regular of the close components or data age on all tools used for cutting drywall.	
			- Implement a cour-code stem, distinguing between safe-to-use and faulty equipment.	
			- Make sure purponal provide equipies as worn at all times when using power tools.	
			- Supress new experienced workers to ensure correct tools are being used effectively.	
			- Keep n. tated in intory list of all tools regularly used and their current condition.	
			- Encouringe in mediater porting of malfunctioning tools to prevent potential injuries.	
4. Manual handling/carrying drywall sheets	Back injury from heavy line user injury if material is dropped.	ЗН		2M

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and gualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

#### SAFE WORK N THE ST ATEM ANT MONITORING AND REVIEW

d must reviewed (and

hav be sted by the operation

should be carried out in

The SWMS must be reviewed regularly to make sure it remains fective revised if necessary) if relevant control measures are revised. The viewn consultation with workers (including contractors htractors Vb of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that persons involved with the work are advised that a revision has been made and how they can acces he revised SWMS, including all persons who will need to change a work procedure or system as a region of the review are advised of the changes in a way that will enable them to implement their duties antly with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies. followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

#### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.	$\boxtimes$	
Foreseeable hazards are identified and documented for each step.	$\boxtimes$	
Any hazards listed in any site risk assessments have been added to the SWMs	$\boxtimes$	
SWMS initial risk (IR) column as well as residual risk (RR) column mpleted.	$\boxtimes$	
Check control measures added to the SWMS are the most effective selection	$\boxtimes$	
Responsible person is assigned and listed on the property of the importation control measures.	$\boxtimes$	
Permit or licenses requirements specified, su as Hot Work, Electric Work, Work at Heights etc.	$\boxtimes$	
SWMS identifies plant and equipment to be use	$\boxtimes$	
Details of inspection checks required for any equipment listed protection on the SWMS.	$\boxtimes$	
Describes any mandatory qualifications, experience, and g or skills required to perform the work.	$\boxtimes$	
Applicable personal protective equipment is selected on the SWMS.	$\boxtimes$	
Reflects and documents any legislative references and/or Australian Standards.	$\boxtimes$	
Identifies any hazardous substances used with specific control measures in line with any SDS.	$\boxtimes$
