THIS SAFE WORK METHOD	STATEMENT IS APPRO' D BY	THE PCL OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or under o (PC 1) is	required to en that a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	opliance the VMS a vell as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS : MS M HAVE THE FOLLOWING COMMUNICATED	NA, 2 OF ALL RELEVANT PERSONNI EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND CO	OMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in account with gislative requirements to first identify any site hazards, hazards and then to further take steps to either eliminate or continuous each hazard.			
If an incident or a near miss occurs, all work must sto, an ataly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Improper handling of animals, Lack of Personal Protective Equipment (PPE)	ЗН	 Conduct thorough training sessions for all cosonnel on proper animal handling techniques to minimise risks. Develop and follow a standard operating provide (SOP) specifically tailored to the handling of each type of animal. Ensure that appropriate Persural Protective Equipment (Co.E.) such as gloves, goggles, masks, and protective clothing is a principle an amendatory for all covers. Perform regular rispection and reintenance of PPE to ensure it is in good condition and effective. Establish city cones and arriers for piromandling areas to prevent unauthorised access and ensure control of environments. Used gong and could cues to communicate safe handling practices and highlight potential hazards in releval lands. Practic care clobs of tion of animal behaviour prior to handling to assess potential risks and adjust horoact accordingly. Innormatic abundy system where workers assist or observe each other during handling operations to rovide pediate support if needed. hedule regular refresher courses on safe animal handling and PPE use to keep skills current and awareness high. Ensure easy access to first aid kits and emergency response equipment, and make sure all workers know how to use them in case of an incident. 	2M
2. Animal Transport	Inadequate transport facilities, Poorly maintained machinery	ЗН	 Ensure all transport vehicles are regularly inspected and maintained to meet safety standards, including brakes, tyres, and loading equipment. Engage qualified personnel to operate and oversee transportation vehicles, ensuring familiarity with animal safe handling protocols. Install non-slip flooring in the transport containers to reduce the risk of animals slipping and sustaining injuries during transit. Ensure that cages or holding pens are appropriately secured to prevent movement during transport. Provide appropriate ventilation within transport vehicles to maintain a controlled environment that prevents animal distress due to heat or poor air quality. Establish secure loading ramps to facilitate safe and stress-free transfer of animals into transport vehicles. Implement regular training for handlers on safe animal loading and unloading techniques to minimise stress and injury risk. 	1L

SPECIFIC WORK STEPS HAZARDS THAT MAY ARISE NITRAL SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS - Ensure compliance with relevant regulations and guidelines related to animal welface during transport, including proper spacing and rest periods. - Monitor animal wellbeing throughout the journey and surveillance systems if necessary, to quickly address any signs of distress or injury. - Use signage on vehicles to indicate live an use onboar sensitising other road users and promoting cautious driving around the transport vehicle. - Develop contingency plans for emergencies, and a vehicle threaddowns or accidents, to ensure prompt action can be taken to protect oph animals and s. - Provide training and sensity of the standard vehicles of the self-downs or accidents, to ensure prompt action can be taken to protect oph animals and s. - Provide training and sensity of the sensity of	JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
including proper spacing and rest periods. - Monitor animal wellbeing throughout the journeys any surveillance systems if necessary, to quickly address any signs of distress or injury. - Use signage on vehicles to indicate live a last onboar sensitising other road users and promoting cautious forting around the transport vehicle. - Develop contingency plans for emergencies, a gras vehicle breakdowns or accidents, to ensure prompt action can be taken to protest oth animals and s. - Provide training or wan a gans and an adding techniques to minimise the risk of foodborne diseases. - Wear appried of persons rotects dequire for and after feeling animals to prevent contamination. - Regular wash in a Writh soap and water before and after feeling animals to prevent contamination. - Ensil La vedering illuprent and utensils are cleaned and sanitised after each use. - Keep Illinas ed sto be areas clean and pest-free to avoid spoilage and contamination. - Invoide fliergy quareness training to workers, including recognising and responding to allergic reads use. - Clearly sell all animal feeds to identify allergens present, and provide alternative options when possible. - Sourage staff with known allergies to carry their medication or EpiPens at all times. - Establish a protocol for immediate response in case of an allergic reaction, including contacting medical services. - Ensure that fresh and uncontaminated feed is used for each feeding session. - Segregate feeding zones from other work areas to reduce cross-contamination risks. - Implement a regular cleaning schedule for feeding areas to maintain tygiene standards. - Require workers to report any symptoms of illness after contact with animal feed, facilitating timely medical intervention if needed. SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SWMS		
SWMS initial risk (IR) column as well as residual risk (RR) column ppleted.		
Check control measures added to the SWMS are the most effective selections		
Responsible person is assigned and listed on the part the important portrol measures.		
Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc.		
SWMS identifies plant and equipment to be us		
Details of inspection checks required for any equipment listed an inoted on the SWMS.		
Describes any mandatory qualifications, experience, a g or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
