THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	eting a business or under the (PC 1) is	required to en that a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	poliance the VMS a well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS & VMS MAY HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONNI EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND COTHIS SWMS	OMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in account with gislative requirements to first identify any site hazards, comparing those hazards and then to further take steps to either eliminate or continuous each hazard.			
If an incident or a near miss occurs, all work must ste, an alately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

1. Preparation	Trip hazards, Falls from heights, Electrical hazards	3H, 2N 3H	<ul> <li>Conduct a site inspection to identify and proving trip hazards present, such as loose cords or debris, and ensure they are removed or secured.</li> <li>Use appropriate signage and barriers to high and exential trip hazards and guide safe pathways around the work area.</li> <li>Ensure all workers wear suit to a personal protect the gure trent (PPE), including safety boots with non-slip soles, to prevent dise and to</li> <li>Utilize step landers or scale lidings the secure folding and handrails when working at heights to minimise the risk of far.</li> <li>Inspectal adders and scale diding before use to ensure they are in good condition and correctly positioned on structuround.</li> <li>Assignate other or efety observer when working at height to provide assistance and monitor for unsafe conditions.</li> <li>Make see all to ctrical tools and equipment are inspected for visible damage and tagged as tested and inspected recording to Australian standards.</li> <li>Use put tools equipped with Residual Current Devices (RCDs) to reduce the risk of electrical shock life performing trim installation near electrical outlets.</li> <li>Exercise all electric cords are routed away from walkways and work zones to prevent tripping or accidental disconnection during work tasks.</li> <li>Provide training for workers on electrical safety and proper handling of tools around live circuits to promote awareness and accountability.</li> <li>Allow only qualified personnel to perform tasks involving electrical connections and modifications to prevent hazardous exposure to electricity.</li> <li>Review and revise Safe Work Method Statement (SWMS) regularly to incorporate new safety practices and maintain compliance with regulatory standards.</li> </ul>	1L, 1L, 2M
2. Measure and Mark	Eye injuries, Cuts or abrasions	3Н, 3Н	<ul> <li>Provide and wear appropriate personal protective equipment, including safety glasses, to protect against dust and debris.</li> <li>Ensure measuring tools are in good condition and free from defects to avoid inaccuracies that could lead to improper cuts or adjustments.</li> <li>Use a sharp pencil rather than a pen or marker for precise marking, reducing the need for repetitive motions that could cause strain.</li> <li>Keep fingers clear of the tape measure's recoil mechanism to prevent injuries when retracting.</li> <li>Maintain proper body posture and ergonomic positioning while measuring and marking to reduce the risk of muscular strain.</li> </ul>	1L, 2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Ensure adequate lighting in the workspace to improve visibility and accuracy when marking measurements.	
			- Temporarily cover or remove sharp edges or object in the work area to prevent accidental cuts or abrasions during marking.	
			- Conduct regular tool inspections and main nance checoto to ensure all devices are functioning correctly and safely.	
			- Use measuring tapes and straightedges with some grips or non-slip surfaces to maintain control over the tools.	
			- Before commencing verify that he workspace around sorways is clear of obstacles to prevent trips or falls.	
			- Train work can the correct use of a ls and calpment used for measuring and marking to ensure safe and efficient partice.	
			- Esta a clear conduction channel among team members to coordinate signals or instructions when as ling with inger measurements.	
	Dust inhalation, Noise exposure, Machinery accidents		Ensure all waters has been trained in safe use of machinery and personal protective equipment PE).	
			- Program propriate respiratory protection masks that meet Australian standards for dust control.	
			mplement a regular maintenance schedule for all cutting equipment to ensure it is in proper working or r.	
			Utilize saws with built-in dust extraction systems or attach portable vacuums to collect dust at the source.	
			- Limit exposure time by rotating tasks among workers and scheduling regular breaks.	
3. Cutting Architrave		3H, 4A,	- Require mandatory hearing protection, such as earplugs or earmuffs, when using loud equipment.	2M, 1L, 2M
5. Cutting Architave		4A	- Securely fasten architraves in place before cutting to prevent kickback or accidents involving loose materials.	2IVI, IL, 2IVI
			- Barricade or rope off work areas where machinery is in operation to restrict access to authorized personnel only.	
			- Inspect PPE regularly for wear and tear, replacing items as necessary to maintain effectiveness.	
			- Establish clear communication signals between team members during machinery operation.	
			- Keep an organised workspace to minimise tripping hazards and ensure clear access to emergency stop controls on machines.	
			- Post signage to remind workers of PPE requirements and machine safety protocols around the work area.	
4. Sanding and Finishing	Dust inhalation, Skin irritation, Eye injuries	3H, 2M, 3H		1L, 1L, 2M

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

#### SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS	
The company details have been entered, including the project name and address.			
All relevant personnel consulted during the development of the SWMS.			
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	7		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.	$\boxtimes$		
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWMS			
SWMS initial risk (IR) column as well as residual risk (RR) column mpleted.			
Check control measures added to the SWMS are the most effective selectives			
Responsible person is assigned and listed on the part the important measures.			
Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc.			
SWMS identifies plant and equipment to be us			
Details of inspection checks required for any equipment listed an noted on the SWMS.			
Describes any mandatory qualifications, experience, and or skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Reflects and documents any legislative references and/or Australian Standards.	$\boxtimes$		
Identifies any hazardous substances used with specific control measures in line with any SDS.	$\boxtimes$
