ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS : MS M	NA, 2 OF ALL RELEVANT PERSONNI EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND CO	OMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in accomply with gislative requirements to first identify any site hazards, hazards and then to further take steps to either eliminate or continuate hazard.			
If an incident or a near miss occurs, all work must sto, an alately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slips, trips and falls, inadequate training	ЗН	<ul> <li>Conduct a pre-worksite inspection to identify and address any potential slip, trip, or fall hazards such as wet surfaces or uneven ground.</li> <li>Ensure all workers involved in the rigging program are ave undergone appropriate training and hold relevant certification or verification of competency.</li> <li>Provide slip-resistant footween for all personnel to inimit one risk of slipping on wet or slippery surfaces.</li> <li>Clearly mark and cordon or areas with potential sipping hazards and ensure good housekeeping practices are caintained at all times.</li> <li>Use or affolding or elevated work platteness with appropriate handrails if working at height is necessary during an aratic conties.</li> <li>Regularly espect tools and equipment for damage or defects that could pose a safety risk, and remove faulty it has non-service immediately.</li> <li>Implement a bondy system to ensure workers can help each other identify potential hazards and support san work practice.</li> <li>Display can signage warning of potential hazards in the area and steps required to mitigate them.</li> <li>Atablish clear communication channels among team members to quickly resolve any issues related to woodspace organisation and hazard identification.</li> <li>Review and update Safe Work Method Statements (SWMS) regularly to incorporate feedback from workers and recent workplace incidents.</li> </ul>	2M
2. Equipment Inspection	Faulty equipment, lack of proper certification	4A	<ul> <li>Conduct a thorough visual inspection of all rigging equipment prior to use, checking for signs of wear and tear, damage, or deformities.</li> <li>Ensure all rigging equipment has current and valid certification tags visible and legible before commencing work.</li> <li>Implement a regular maintenance schedule for all equipment, where checks are logged and any issues addressed promptly.</li> <li>Assign a competent and trained inspector to verify the condition and certification status of equipment.</li> <li>Use properly rated and tested equipment that matches or exceeds the weight and type of load being handled.</li> <li>Immediately quarantine and tag out of service any equipment showing faults, missing certification, or damage until it is assessed and repaired by qualified personnel.</li> <li>Verify and cross-reference equipment serial numbers with certification records to ensure authenticity and compliance.</li> </ul>	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Provide training and refresher sessions for workers on identifying faulty equipment and understanding certification requirements.	
			- Store equipment appropriately in dry and suitable anditions to prevent corrosion, rust, or other damage.	
			- Limit access to rigging equipment to authority a personnel only to ensure accountability and control over equipment condition.	
			- Develop and follow a procedure for reporting a few e equipment promptly to a supervisor or safety officer.	
			- Ensure the availability of space certified equipment to the sperations are not compromised if faulty equipment is identified	
			- Display clear of Lage in hipmen storage are reminding employees of the importance of inspection and certification compliance.	
			- Core a pre- condition of the vehicle, checking brakes, lights, tires, and steering to ensure it's in safe variation of the vehicle, checking brakes, lights, tires, and steering to ensure it's in safe variation of the vehicle, checking brakes, lights, tires, and steering to ensure it's in safe variation of the vehicle, checking brakes, lights, tires, and steering to ensure it's in safe variation.	
			- Ensure that I'll drives have valid licences and are trained in transporting heavy loads safely and securely	
			- cert jed loa restraints and binders to secure loads, preventing any movement during transit.	
			Distribute he weight of the load evenly on the vehicle to maintain balance and prevent tipping.	
			an the route in advance to avoid areas with low bridges, narrow roads, or other obstacles unsuitable for arge vehicles.	
			- Implement a speed limit policy for vehicles carrying heavy or oversized loads to reduce the risk of accidents.	
3. Transport to Site	Vehicle accidents, having	ЗН	- Ensure regular communication between the driver and the site team to coordinate arrival times and unloading procedures.	2M
			- Equip the vehicle with safety equipment such as reflective triangles, fire extinguishers, and first aid kits.	
			- Use spotters or banksmen during reversing or manoeuvring of vehicles at the site to prevent collisions or injuries.	
			- Conduct a risk assessment for potential weather conditions that could affect transport, such as rain, fog, or strong winds.	
			- Maintain a record of the load's weight and dimensions to ensure it complies with road regulations and does not exceed legal limits.	
			- Brief drivers on emergency procedures in case of an accident or road incident, including contact numbers and steps to follow.	
			- Verify that the vehicle is fitted with appropriate signage and lighting when transporting oversized loads for visibility to other road users.

#### SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

#### SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SWMS		
SWMS initial risk (IR) column as well as residual risk (RR) column pleted.		
Check control measures added to the SWMS are the most effective selections		
Responsible person is assigned and listed on the part the important control measures.		
Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc.		
SWMS identifies plant and equipment to be us		
Details of inspection checks required for any equipment listed an inoted on the SWMS.		
Describes any mandatory qualifications, experience, and or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
