

Slips Or Trips On Wet Surfaces During Mopping Or Floor Cleaning | SAFE WORK METHOD STATEMENT (SWMS) TASK OR ACTIVITY: Slips Or Trips On Wet Surfaces During Mopping Or Floor Cleaning **Business Name:** ABN: SWMS# Business Address: Contact Person: Phone: THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PC. YOF THE PROJECT (PC_1) is required to en that a safe work method statement (SWMS) is prepared before Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or under the proposed work starts. Full Name: Date: Title: Signature: Details of the person(s) responsible for ensuring implementation, monitoring pliance VMS arrivell as reviews and modifications of the SWMS. Full Name: Title: Phone: ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS STIMS IN NA 2 OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE HAVE THE FOLLOWING COMMUNICATED EVELOPMENT AND APPROVAL OF THIS SWMS Safety meetings or toolbox talks will be sched and in account to the sched and in account to the schedule of t with gislative requirements to first identify any site hazards. nica those hazards and then to further take steps to either eliminate or conf each hazard. If an incident or a near miss occurs, all work must ste alately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Unstable or inappropriate footwear, Misuse of cleaning chemicals	ЗН	 Conduct a footwear assessment to ensure a staff wear stable, non-slip shoes that are appropriate for wet surfaces. Implement standards for appropriate footwear are conduct regular inspections to ensure compliance. Provide training on the corn of use of cleaning a micals and visure Safety Data Sheets (SDS) are accessible in the work area. Use warning sign and evert others of wet floors during and after mopping or cleaning activities. Schedule flor cleaning during time with microal foot traffic to reduce the potential for slips and trips. Ensure staff or trained a proper moping techniques to avoid pooling water on the floor. Use or rebent, requality mop heads and change them regularly to prevent excessive moisture on cleaners is neces. Doubly the other the connectibility of cleaning products with different types of flooring to prevent slippery residues. In cular maintain and inspect all cleaning equipment to ensure it is in safe working condition. Train is a too immediately clean up spills or leaks in addition to scheduled floor cleaning. In plement a buddy system for staff working in high-risk areas, so they can assist each other if necessary. Supply and enforce the use of non-skid mats or runners in frequently wet or high-traffic areas. Establish a communication protocol for reporting hazards or incidents related to cleaning activities immediately. Use colour-coded buckets and tools for various chemical products to prevent improper mixing of substances. 	2M
2. Initial Wet Mopping	Slips on wet surface, Cross- contamination from dirty mop water, Chemical burns from cleaning solution	ЗН	 Use wet floor signage to alert others of the potential hazard. Select slip-resistant footwear for all personnel involved in the mopping process. Dilute cleaning chemicals according to manufacturer instructions to prevent chemical burns. Ensure proper ventilation when using cleaning solutions to avoid inhalation risks. Use a mop system with separate clean and dirty water compartments to reduce cross-contamination. Implement a training program on safe mopping techniques and awareness of hazards. Schedule mopping during low foot traffic times to minimise the risk of slips. Regularly check and maintain equipment, such as wringers and buckets, to ensure they are in good working condition. 	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS - Incorporate absorbent mats at entrances to help remove excess moisture. - Employ quick-drying products or methods to reduce floor drying time. - Avoid excessive application of water by using the proposition personal protective equipment, such as gloves, to handle cleaning solutions safely. - Have spill kits readily available to address any proceeding promptly.	RESIDUAL RISK
3. Rinse Mop and Bucket	Slips from water spills, Exposure to cleaning chemicals	3H	 Use wet floor signs to alert olders of the slippery's conditions. Wear slip-resist a root of the recession of the slipping risks. Ensure that the cleaning and is seen need to during mopping to prevent pedestrian access. Avoid excession use of pater to limit stars and pooling. Regular check or maintain equipment to ensure it functions properly without leaks. Educate encloyees of proper mopping techniques to minimise water dispersion. Use appropriate cleaning agents that provide effective results without creating excess slipperiness. In the encloyees of emergency response for incidents involving slips or exposure to chemicals. Store is using chemicals in a secure location to avoid accidental spills. Le a mop bucket with a wringer to control the amount of water applied to the floor. Immediately clean up any spilled cleaning solution to prevent chemical exposure. Ensure adequate ventilation to disperse any fumes from cleaning agents. Schedule cleaning times when foot traffic is minimal, such as after business hours. Conduct regular inspections of mopped areas to address any remaining wet spots or hazards. 	1L
4. Repeat Wet Mopping	Continual slips on wet surface, Muscle strain from repetitive motion	3Н		1L

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS		
The company details have been entered, including the project name and address.				
All relevant personnel consulted during the development of the SWMS.				
Name, signature, position and date signed of the person approving the SWMS.				
Specific personnel and qualifications, experience is noted in the SWMS.	7			
Provides a step-by-step process of tasks required to carry out the activity or task.				
Adequate risk assessment of any identified hazards has been completed.				
Foreseeable hazards are identified and documented for each step.				
Any hazards listed in any site risk assessments have been added to the SWMS				
SWMS initial risk (IR) column as well as residual risk (RR) column pleted.				
Check control measures added to the SWMS are the most effective selections				
Responsible person is assigned and listed on the part the important control measures.				
Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc.				
SWMS identifies plant and equipment to be us				
Details of inspection checks required for any equipment listed an inoted on the SWMS.				
Describes any mandatory qualifications, experience, and or skills required to perform the work.				
Applicable personal protective equipment is selected on the SWMS.				
Reflects and documents any legislative references and/or Australian Standards.				
Identifies any hazardous substances used with specific control measures in line with any SDS.
