

Soil Preparation, Mulching and Vegetation Processing | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Soil Preparation, Mulching and Vegetation Processing

Business Name:	ABN:	SWMS#
Business Address:		
Contact Person:	Phone:	Email:

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:		
Signature:	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring compliance of the SWMS as well as reviews and modifications of the SWMS.		
Full Name:	Title:	Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

- | | |
|--|--|
| <input type="checkbox"/> involves a risk of a person falling more than 2 meters | <input type="checkbox"/> is carried out on or near pressurised gas mains or piping |
| <input type="checkbox"/> is carried out on a telecommunication tower | <input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines |
| <input type="checkbox"/> involves demolition of an element of a structure that is load-bearing | <input type="checkbox"/> is carried out on or near energised electrical installations or services |
| <input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure | <input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere |
| <input type="checkbox"/> involves, or is likely to involve, disturbing asbestos | <input type="checkbox"/> involves tilt-up or precast concrete |
| <input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse | <input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor |
| <input type="checkbox"/> is carried out in or near a confined space | <input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant |
| <input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives | <input type="checkbox"/> is carried out in areas with artificial extremes of temperature. |
| <input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning. | <input type="checkbox"/> involves diving work. |

ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	Administrative Change the work.
Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.								PPE

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Permit or Licenses Requirements

Mandatory Qualifications and Training

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
Pre-start planning and consultation	<ul style="list-style-type: none"> Unidentified underground services Unclear work boundaries Unverified plant suitability Inadequate traffic separation Extreme weather exposure 	3H	<ul style="list-style-type: none"> Obtain and review current Dial Before You Dig / Before You Dig Australia (BYDA) plans and confirm all known underground services before work Walk the site and mark exclusion zones, access ways and no-go areas with bunting, cones or temporary fencing before starting machinery Confirm all operators hold the appropriate HRW licence – VOC for specific plant such as forestry mulchers, rotary hoes and log splitters Develop a site specific SMS and toolbox talk covering soil preparation, mulching, composting and hazardous vegetation tasks and have all workers sign on Schedule high noise or high-dust tasks for cooler, low-wind periods wherever practicable to minimise heat stress and dust generation Check weather forecast for high fire danger, storms or extreme heat and postpone mulching and hot-running plant work during Total Fire Ban or severe storm warnings Establish a communication plan including UHF channel allocation, hand signals and emergency call-out procedure before work starts Confirm first aid kit, fire extinguishers (ABE and water where suitable) and emergency contact list are on site and accessible 	2M
Site inspection and service locating	<ul style="list-style-type: none"> Contact with underground services Unstable or waterlogged ground Hidden voids or soft spots Sharp debris and scrap metal Uncontrolled public access 	4A	<ul style="list-style-type: none"> Physically inspect the entire work area on foot, noting slopes, access limitations, overhead obstructions and likely service corridors Use a calibrated cable and pipe locator and non-conductive hand tools to positively identify and mark out underground services before mechanical excavation or rotary tilling Mark exclusion zones at least 1 m either side of identified services and prohibit use of forestry mulchers, rotary tillers, excavators or augers in those zones Probe ground with a suitable rod to identify voids, buried rubbish or old pits prior to moving heavy plant over the area Remove or clearly flag protruding star pickets, reo, wire, scrap metal and large rocks before operating mulchers or rotary hoes Install temporary fencing, barrier mesh or lockable gates where the work zone is adjacent to public areas, schools or footpaths DO NOT commence mechanical soil preparation in any area where services cannot be confidently located or isolated 	2M
Traffic and plant movement control	<ul style="list-style-type: none"> Unplanned vehicle movement Collision with workers or public Reversing plant blind spots 	3H	<ul style="list-style-type: none"> Develop and display a simple traffic management plan showing entry, exit, one-way routes and pedestrian exclusion zones 	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
	<ul style="list-style-type: none"> Interaction with delivery trucks Soft edges and embankment collapse 		<ul style="list-style-type: none"> Use trained spotters wearing high-visibility vests to guide reversing trucks, wood chippers, forestry mulchers and utes where visibility is restricted Fit plant with operational reversing alarms, flashing beacons and mirrors; verify all safety devices function during pre-start checks Park trucks and trailers on firm, level ground and chock wheels before loading or unloading soil, mulch and compost Keep pedestrians and ground crew outside the plant swing radius and at least 2 m clear of moving tyres or tracks Install physical barriers or bunds along edges of ditches, embankments or unstable batters to prevent plant roll-over DO NOT allow mobile phones or headphones to be used by plant operators or spotters while directing or driving Limit vehicle speed on site and install temporary speed signs where shared access roads are used 	
Manual handling soil and compost	<ul style="list-style-type: none"> Muscular strain from lifting bags Repetitive shovel use Awkward postures in garden beds Contact with pathogenic micro-organisms Dust and bioaerosol inhalation 	3H	<p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p>	2M
Hazardous vegetation assessment	<ul style="list-style-type: none"> Poisonous plants contact Allergenic plant sap Thorn and prickly puncture Hidden asbestos contaminated soil Snake and spider habitat disturbance 	3H	<p>[REDACTED]</p> <p>[REDACTED]</p> <p>[REDACTED]</p>	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
Operating forestry mulchers and mulching machines	<ul style="list-style-type: none"> • Entanglement in rotating drums • High-velocity flying debris • Machine roll-over on slopes • Hydraulic hose failure • Noise induced hearing loss 	4A		2M
Mulching vegetation and large areas	<ul style="list-style-type: none"> • Hidden rocks and metal in vegetation • Uncontrolled vegetation kickback • Dust and wood chip inhalation • Fatigue from extended machine use • Fire ignition from hot exhausts 	3H		1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
Rotary hoe, rototiller and cultivator use	<ul style="list-style-type: none"> • Entanglement in tines • Loss of control on slopes • Contact with buried services • Thrown stones and clods • Excessive vibration exposure 			2M
Clearing vegetation and log splitting	<ul style="list-style-type: none"> • Chainsaw kickback and cuts • Pinch points in log splitters • Flying wood fragments • Rolling or shifting logs • Noise and vibration exposure 	4A		2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
Placing topsoil and forming stockpiles	<ul style="list-style-type: none"> • Stockpile collapse and engulfment • Plant roll-over on pile edges • Dust from tipping operations • Contact with overhead services • Restricted visibility while tipping 	3H		1L
Laying mulch and topdressing	<ul style="list-style-type: none"> • Trip hazards from uneven surfaces • Contact with sharp mulch contaminants • Hand and wrist strain from raking • Irritation from coloured mulches • Vehicle and pedestrian interaction 	2M		1L
Composting and organic waste management	<ul style="list-style-type: none"> • Spontaneous combustion in compost • Release of bioaerosols and spores 	3H		2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
	<ul style="list-style-type: none"> Leachate contaminating ground Vermine and insect infestation Odour impacting neighbours 			
Repairing stump grinding damage	<ul style="list-style-type: none"> Uneven ground and trip hazards Hidden voids under grindings Contact with buried Flying debris from backfilling Musculoskeletal pain from 			1L
Equipment maintenance and refuelling	<ul style="list-style-type: none"> Uncontrolled machine startup Fuel spill and fire Contact with hot engine parts Exposure to oils and greases Use of incorrect parts or tools 	3H		1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
Environmental and housekeeping controls	<ul style="list-style-type: none"> • Green waste encroaching on drains • Slip and trip from offcuts • Contaminated stormwater runoff • Uncontrolled dust from bare soil • Noise disturbance to neighbours 	2M		1L

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represent that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.	<input checked="" type="checkbox"/>	
All relevant personnel consulted during the development of the SWMS.	<input checked="" type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input checked="" type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input checked="" type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input checked="" type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input checked="" type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input checked="" type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	<input checked="" type="checkbox"/>	
Check control measures added to the SWMS are the most effective selected.	<input checked="" type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input checked="" type="checkbox"/>	
Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input checked="" type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input checked="" type="checkbox"/>	
Details of inspection checks required for any equipment listed and noted on the SWMS.	<input checked="" type="checkbox"/>	
Describes any mandatory qualifications, experience, training or skills required to perform the work.	<input checked="" type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input checked="" type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input checked="" type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input checked="" type="checkbox"/>
