| THIS SAFE WORK METHOD | STATEMENT IS APPRO | THE PC. OF THE ROJECT | | | | | | | |
| Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or under the group of (PC, U) is required to en use that a safe work method statement (SWMS) is prepared before the proposed work starts. | | | | | | | | | |
| Full Name: | | | | | | | | | |
| Signature: | | Title: | Date: | | | | | | |
| Details of the person(s) responsible for ensuring implementation, monitoring | opliance the VMS a well as review | s and modifications of the SWMS. | | | | | | | |
| Full Name: | | Title: | Phone: | | | | | | |
| ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS MAN PHAVE THE FOLLOWING COMMUNICATED | NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF | EL WHO HAVE BEEN CONSULTED AND CO THIS SWMS | OMMUNICATED TO IN THE | | | | | | |
| Safety meetings or toolbox talks will be sched ed in according with gislative requirements to first identify any site hazards, so the companies those hazards and then to further take steps to either eliminate or continue acch hazard. | | | | | | | | | |
| If an incident or a near miss occurs, all work must stop an added. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. | | | | | | | | | |
| Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. | | | | | | | | | |
| The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident. | | | | | | | | | |

| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE RISK | | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Improper training, Personal susceptibility | ЗН | Conduct comprehensive training sessions call staff involved in substance misuse testing to ensure they are well-informed about procedures all volicies. Develop a robust induction program for new on these that includes education on workplace substance misuse policies and the importance of adhereno. Create clear written protoconstatiling step-by-site procedures for conducting substance misuse tests, and ensure they are notify available to all relevant s. Implement a nomar audu process in assess the some peteron of personnel involved in substance misuse testing and heatify any area in needing mprocedure. Proven refressor courses on substant emisuse policy and procedure updates to keep all team members curre. Ensul personal protective equipment (PPE) is provided and utilised appropriately to safeguard against potential explorer due testing. Develora concential support system for employees who may be susceptible to substance misuse issues, encouring of them to seek help without fear of reprisal. Identify decide the additional environment of the substance misuse issues. Apoint a dedicated health and safety officer responsible for overseeing the preparation and mplementation of substance misuse testing programs. Maintain open communication channels for employees to ask questions and express concerns regarding substance misuse testing process and suggest improvements. Collaborate with specialised external consultants when necessary to enhance training and address specific challenges related to substance misuse. | 2M |
| 2. Equipment setup | Electrical faults, Poor maintenance | ЗН | Conduct regular inspection and testing of all electrical equipment to ensure it meets Australian safety standards. Use only tested and tagged electrical equipment for setup to prevent electrical faults. Ensure that all staff involved in equipment setup are trained in recognising electrical hazards. Implement a routine maintenance schedule to ensure equipment is in good working condition. Maintain a logbook for recording maintenance activities and any identified issues with equipment. Use Residual Current Devices (RCDs) for extra protection against electrical shocks during equipment setup. | 2M |

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR |
|--------------------------|---|-----------------|--|------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS - Ensure that all cables and cords are free from damage and positioned to avoid exposure to moisture or physical damage. - Provide clear signage around electrical equipment varning of potential electrical hazards. - Appoint a qualified electrician to address are user to for user to reprocedures. | RESIDUAL RISK |
| 3. Substances Handling | Accidental ingestion, Skin contact | 4A | Keep emergency contact numbers and first-aidouts readily are esible in case of an electrical incident. Provide thorough that a point counct handling processes and the risks associated with substances. Ensure the contability of propriate personal potective equipment (PPE), including gloves, goggles, and long-slessed clothing. Importent providations of all substances with clear hazard symbols and handling instructions. Estate is designable areas for substance handling away from food preparation or consumption zones to avoid a cidental ingenon. Install focure porage acilities for all chemicals, ensuring they are out of reach of unauthorised aconst. Consistent agents and inspections to ensure compliance with handling protocols. Develop and communicate emergency response plans for incidents involving substance exposure. Unuse spill containment measures such as drip trays to prevent skin contact during accidental spillage. Advocate the practice of washing hands thoroughly immediately after handling any substances. Regularly review and update the safety data sheets (SDS) for each substance handled, including potential hazards and first aid measures. | 2M |
| 4. Collection of samples | Biohazard exposure, Needle stick injury | 4A | | 2M |

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and gualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK N THE ST ATEM ANT MONITORING AND REVIEW

d must reviewed (and

hav be sted by the operation

should be carried out in

The SWMS must be reviewed regularly to make sure it remains fective revised if necessary) if relevant control measures are revised. The viewn consultation with workers (including contractors htractors Vb of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that persons involved with the work are advised that a revision has been made and how they can acces he revised SWMS, including all persons who will need to change a work procedure or system as a region of the review are advised of the changes in a way that will enable them to implement their duties antly with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies. followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS |
|---|-------------|----------|
| | | |
| The company details have been entered, including the project name and address. | | |
| All relevant personnel consulted during the development of the SWMS. | | |
| Name, signature, position and date signed of the person approving the SWMS. | | |
| Specific personnel and qualifications, experience is noted in the SWMS. | | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | | |
| Adequate risk assessment of any identified hazards has been completed. | \boxtimes | |
| Foreseeable hazards are identified and documented for each step. | \square | |
| Any hazards listed in any site risk assessments have been added to the SWMs | \boxtimes | |
| SWMS initial risk (IR) column as well as residual risk (RR) column mpleted. | \boxtimes | |
| Check control measures added to the SWMS are the most effective selection | \boxtimes | |
| Responsible person is assigned and listed on the property of the importation control measures. | \boxtimes | |
| Permit or licenses requirements specified, su as Hot Work, Electric Work, Work at Heights etc. | \boxtimes | |
| SWMS identifies plant and equipment to be use | \boxtimes | |
| Details of inspection checks required for any equipment listed protection on the SWMS. | \boxtimes | |
| Describes any mandatory qualifications, experience, and g or skills required to perform the work. | \boxtimes | |
| Applicable personal protective equipment is selected on the SWMS. | \boxtimes | |
| Reflects and documents any legislative references and/or Australian Standards. | \boxtimes | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | \boxtimes | |
