

## Table Saw | SAFE WORK METHOD STATEMENT (SWMS)

### TASK OR ACTIVITY: Table Saw

Business Name:	ABN:	SWMS#
Business Address:		
Contact Person:	Phone:	Email:

### THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:		
Signature:	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring compliance of the SWMS as well as reviews and modifications of the SWMS.		
Full Name:	Title:	Phone:

### ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

### NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

### CLIENT OR PRINCIPAL CONTRACTOR DETAILS

Client:	SCOPE OF WORKS
Project Name:	
Project Address:	
Project Manager:	
Contact Phone:	
Date SWMS supplied to Project Manager:	

### ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

- |  |  |
|--|--|
| <input type="checkbox"/> involves a risk of a person falling more than 2 meters  | <input type="checkbox"/> is carried out on or near pressurised gas mains or piping                                     |
| <input type="checkbox"/> is carried out on a telecommunication tower   | <input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines                                 |
| <input type="checkbox"/> involves demolition of an element of a structure that is load-bearing                         | <input type="checkbox"/> is carried out on or near energised electrical installations or services                      |
| <input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure            | <input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere                |
| <input type="checkbox"/> involves, or is likely to involve, disturbing asbestos  | <input type="checkbox"/> involves tilt-up or precast concrete  |
| <input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse  | <input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor |
| <input type="checkbox"/> is carried out in or near a confined space  | <input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant  |
| <input type="checkbox"/> is carried out in/near a shaft or trench deeper than 2m or tunnel involving use of explosives | <input type="checkbox"/> is carried out in areas with artificial extremes of temperature.                              |
| <input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.             | <input type="checkbox"/> involves diving work.   |

### ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

RISK MATRIX									
LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS	
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<p><b>Elimination</b> Remove the hazard.</p> <p><b>Substitution</b> Replace the hazard.</p> <p><b>Isolation</b> Isolate People from the hazard</p> <p><b>Engineering</b> Isolate the hazard.</p> <p><b>Administrative</b> Change the work.</p> <p><b>PPE</b></p>	
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED		
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.		
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.		
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records		

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

PERSONAL PROTECTIVE EQUIPMENT (PPE)											
Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slips, trips and falls, Incorrect setup	2M	<ul style="list-style-type: none"> <li>- Ensure proper housekeeping procedures are in place, including the regular cleaning and maintenance of work areas to minimise slips, trips, and falls.</li> <li>- Provide appropriate safety signage and barriers to identify and potential hazards, such as wet floors and cable runs, to raise awareness and prevent accidents.</li> <li>- Train workers on the safe use and setup of table saws, including the correct use of fences, guards, and other safety features.</li> <li>- Develop a pre-start checklist for table saw operations to ensure that all necessary precautions have been taken before commencing work.</li> <li>- Inspect all equipment and power tools prior to use, checking for any damage or wear that may affect the safe operation of the table saw.</li> <li>- Utilise anti-slip floor mats and appropriate footwear with non-slip soles in high-risk areas to reduce the risk of slipping.</li> <li>- Encourage workers to report any hazards or unsafe conditions immediately and implement corrective actions in a timely manner.</li> <li>- Implement a system for managing cables and hoses to minimise trip hazards, such as using cable trays, hooks, or bundling.</li> <li>- Establish clear traffic pathways within the workspace, ensuring walkways are free from obstructions and trip hazards.</li> <li>- Implement a proper lighting system within the workplace to ensure adequate visibility during tasks, preventing accidents caused by poor lighting conditions.</li> <li>- Organise and store materials and equipment safely and securely when not in use, minimising clutter and potential hazards.</li> <li>- Conduct regular safety inspections and audits to identify potential risks and areas for improvement, promoting a proactive approach to hazard management.</li> </ul>	1L
2. Machine Inspection	Damaged equipment, Missing safety guards	3H	<ul style="list-style-type: none"> <li>- Regularly inspect the table saw and its components, including the motor, blade, and safety guards, ensuring they are in good working condition before use.</li> <li>- Implement a formal inspection schedule to regularly check for any signs of damages, excessive wear or missing parts. Assign a responsible person for carrying out these checks and maintaining records.</li> <li>- Immediately report any damage, faults, or missing safety guards to the supervisor, ensuring that the table saw is tagged as "out of service" until the necessary repairs are made.</li> <li>- Replace damaged or worn parts promptly, according to the manufacturer's instructions, and only use genuine replacement parts to ensure proper fit and function.</li> <li>- Conduct regular maintenance activities, such as lubricating the machine parts and cleaning the saw blades and other components, to prevent deterioration due to prolonged use.</li> </ul>	1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			<ul style="list-style-type: none"> <li>- Train all workers on the proper use, inspection, and maintenance of the table saw, emphasising the importance of following safety procedures to avoid accidents.</li> <li>- Verify that safety guards, such as blade guards, sliding knives, and anti-kickback devices, are in place and securely fastened before operating the machine.</li> <li>- Ensure that required personal protective equipment (PPE) including safety glasses, hearing protection, and gloves, are readily available and used by operators when using the table saw.</li> <li>- Display clear safety signage in the area, indicating proper handling guidelines and highlighting potential hazards associated with the table saw.</li> <li>- Foster an open communication policy encouraging employees to voice concerns or suggestions regarding workplace safety, ensuring that all feedback is appropriately addressed.</li> <li>- Encourage a buddy system where experienced operators can periodically observe their peers during table saw use, providing guidance and assistance where needed.</li> <li>- Develop and implement emergency plans and procedures, familiarising staff members with the appropriate actions to take if an incident occurs involving the table saw.</li> <li>- Promote a culture of safety within the workplace supportive of best practices and ensuring that workers actively consider the potential hazards before undertaking any tasks.</li> <li>- Continuously review and update the Safe Work Method Statement (SWMS) to address any new risks or updated safety procedures, keeping the document relevant and effective in maintaining a safe working environment.</li> </ul>	
3. Power Connection	Electrocution, Overloading circuit	3H	<ul style="list-style-type: none"> <li>- Ensure that qualified and licensed electricians install and maintain all electrical equipment, power connections, and circuitry related to the table saw.</li> <li>- Confirm that the table saw's power supply voltage, frequency, and capacity are compatible with the site's electrical infrastructure to prevent overloading or damage to the tool.</li> <li>- Use Ground Fault Circuit Interrupter (GFCI) protected outlets or circuit breakers for the table saw's power connection to reduce the risk of electrocution.</li> <li>- Follow a stringent routine inspection schedule for all wires, cables, and plugs connected with the table saw to identify and repair any possible wear, tear, frays, or other damages before operation.</li> <li>- Establish clear guidelines for workers on how to safely connect and disconnect the table saw from its power source, including unplugging the device when not in use, changing blades, or performing maintenance tasks.</li> <li>- Implement clear signage near the power connection indicating potential electrocution hazards and reminding workers of proper safety protocols.</li> <li>- Train all operators and relevant staff on the specific electrical safety requirements associated with operating a table saw, including emergency response plans in case of electrocution incidents.</li> <li>- Consider incorporating overload protection devices or features within the table saw's electrical system to prevent circuit overloading and potential workplace accidents.</li> <li>- Keep the immediate area around the table saw and its power source clean, dry, and free from debris, liquids, or anything that may cause electrical hazards.</li> </ul>	1L

		<p>own, employing the necessary personal protective equipment (PPE).</p> <ul style="list-style-type: none"> <li>- Regularly review and update the Safe Work Method Statement (SWMS) based on feedback from workers, previous incidents, evolving industry standards, and technological advances in safety practices and electrical systems.</li> </ul>

## SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

## SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represent that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

### SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.	<input checked="" type="checkbox"/>	
All relevant personnel consulted during the development of the SWMS.	<input checked="" type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input checked="" type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input checked="" type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input checked="" type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input checked="" type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input checked="" type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	<input checked="" type="checkbox"/>	
Check control measures added to the SWMS are the most effective selected.	<input checked="" type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input checked="" type="checkbox"/>	
Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input checked="" type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input checked="" type="checkbox"/>	
Details of inspection checks required for any equipment listed as noted on the SWMS.	<input checked="" type="checkbox"/>	
Describes any mandatory qualifications, experience, training or skills required to perform the work.	<input checked="" type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input checked="" type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input checked="" type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input checked="" type="checkbox"/>
