

Testing Food Temperatures	Correctly SAFE WORK M	ETHOD STATEMENT (SWMS)
TASK OR AC	TIVITY: Testing Food Temperatu	ires Correctly	
Business Name:		ABN:	SWMS#
Business Address:			
Contact Person:	Phone:	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PCL OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undo	required to en ethat a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:	NY	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring	apliance the VMS a well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS & MS MAY HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	EL WHO HAVE BEEN CONSULTED AND CO THIS SWMS	OMMUNICATED TO IN THE
Safety meetings or toolbox talks will be sched ed in account with a gislative requirements to first identify any site hazards, and then to further take steps to either eliminate or continuous each hazard.			
If an incident or a near miss occurs, all work must sto, adately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Incorrect storage conditions, Exposure to harmful bacteria	2M	 Ensure all storage equipment, such as refreshators and freezers, are maintained regularly and operating at the correct temperatures. Clearly label storage areas with temperature are aments for different food types to prevent cross-contamination. Implement a first-in, first-oute (FO) system to mine (see figure spoilage and maintain freshness. Train staff in procession and line and storage practices to enhance awareness of safety procedures. Use calibrate unermome as to acceptable of a safety of a sand record food temperatures during storage. Establish as a cadule for a gular temperature checks of all storage equipment to ensure compliance with safety endards. Proving a tective obthing and hygiene training to limit direct contact with potentially contaminated surface for an and coased items in storage to prevent cross-contamination. Incoming te colour-coded storage containers to differentiate between various food types and reduce the tisk on a coast. Revelop a policy for rejecting deliveries that do not meet specified temperature requirements upon all coal. Document all temperature checks and corrective actions taken as part of a comprehensive record-keeping system. 	1L
2. Equipment Setup	Heat exposure, Equipment malfunction	ЗН	 Provide appropriate personal protective equipment (PPE) such as heat-resistant gloves and safety goggles to prevent burns from heat exposure. Conduct regular maintenance checks on temperature testing equipment to prevent malfunction. Ensure all employees are trained in the safe handling and operation of temperature testing devices. Use insulated containers for transporting hot food samples to minimise direct heat exposure. Implement a lockout/tagout procedure for equipment under maintenance to prevent accidental use. Calibrate temperature testing devices regularly to maintain accuracy and reliability. Maintain a safe distance from hot surfaces when setting up equipment to reduce the risk of burns. Keep a first aid kit readily accessible in case of burns or other injuries related to heat exposure. Ensure clear signage and hazard warnings are displayed around hot equipment and testing areas. Use automated or remote temperature testing equipment where possible to minimise direct human contact with hot items. Supervise new staff during setup to ensure they follow correct procedures and use equipment safely. 	1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Establish an emergency shutdown procedure for quickly deactivating faulty or overheating equipment.	
			- Encourage regular breaks and provide hydration stations for workers to prevent overheating and heat stress.	
3. Clean Thermometer	Chemical exposure, Cross-contamination	2M	 Ensure the thermometer is cleaned with an roved food cade sanitising solution to reduce chemical exposure. Use protective gloves when handling cleaning to ents to preven skin irritation or absorption of chemicals. Train staff on the correct use and potential risks of the eaning chemicals to minimise accidental exposure. Implements oper labelling or all comping solutions to avoid misuse. Storm leaning gents in designated warrly marked area away from food storage zones to prevent cross or amina. Rins the hermony per thoroughly with potable water after applying cleaning agents to remove any residue. Use slin le-us wipes or cloths for cleaning to prevent the spread of bacteria from reused cloths. On atth thermometer in a location separate from where food is prepared or stored to avoid the risk of sontarn. In significant protocols and schedules are visibly posted for staff awareness and compliance. Verify and document the temperature and concentration of the sanitising solution daily to ensure efficacy. Provide adequate training on the importance of preventing cross-contamination and how to effectively achieve this. Ensure all staff know the appropriate steps if cross-contamination is suspected to quickly contain and address the issue. Encourage reporting of spills or incidents immediately to address potential hazards swiftly. 	1L
4. Calibrate Thermometer	Burns from heat/calibration source, Malfunctioning equipment	2M		1L

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS		
The company details have been entered, including the project name and address.				
All relevant personnel consulted during the development of the SWMS.				
Name, signature, position and date signed of the person approving the SWMS.				
Specific personnel and qualifications, experience is noted in the SWMS.	7			
Provides a step-by-step process of tasks required to carry out the activity or task.				
Adequate risk assessment of any identified hazards has been completed.				
Foreseeable hazards are identified and documented for each step.				
Any hazards listed in any site risk assessments have been added to the SWMS				
SWMS initial risk (IR) column as well as residual risk (RR) column pupleted.				
Check control measures added to the SWMS are the most effective selections				
Responsible person is assigned and listed on the part the important control measures.				
Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc.				
SWMS identifies plant and equipment to be us				
Details of inspection checks required for any equipment listed an inoted on the SWMS.				
Describes any mandatory qualifications, experience, and or skills required to perform the work.				
Applicable personal protective equipment is selected on the SWMS.				
Reflects and documents any legislative references and/or Australian Standards.				
Identifies any hazardous substances used with specific control measures in line with any SDS.
