| ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SIMS MANAGED HAVE THE FOLLOWING COMMUNICATED | NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF | EL WHO HAVE BEEN CONSULTED AND C THIS SWMS | OMMUNICATED TO IN THE |
| Safety meetings or toolbox talks will be sched and in account with gislative requirements to first identify any site hazards, comparing those hazards and then to further take steps to either eliminate or continuous each hazard. | | | |
| If an incident or a near miss occurs, all work must sto, quately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity. | | | |
| Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel. | | | |
| The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident. | | | |

| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK |
| 1. Preparation | Lack of proper training, improper use of Personal Protective Equipment (PPE) | 2M | Conduct comprehensive training sessions wall employees involved in pest treatment procedures. Regularly update training programs to incluent the later safety protocols and pest control methods. Verify that all workers understand the important of each piece of Personal Protective Equipment (PPE) and its correct usage. Implement a PPE checklist to usure workers have the cessary gear before beginning work. Conduct regular espectants to entire PPE is in good condition and not expired or damaged. Store PPE propriately to revent integration or damage. Creaticlearly litter stailed guidelines on the use of specific pesticides and other chemicals. Esta is enterged a procedures and practice drills related to accidental exposure or spills. Ensure that it Safe total Sheets (SDS) are accessible to workers at all times. Design the airched supervisor to oversee the preparation phase and address any safety concerns in ediation. Conductor te-work safety briefings to discuss the hazards and appropriate safety measures with the aim. Fivoide easy access to handwashing and decontamination stations to reduce risk of hazardous exposures. Maintain accurate records of training, PPE checks, and safety inspections for accountability and continuous improvement. Encourage workers to report unsafe conditions or potential hazards immediately without fear of retribution. | 1L |
| 2. Arrival at Site | Traffic accidents, interaction with uncooperative clients | ЗН | Conduct a brief site induction with the client's representative to understand specific site hazards and orientation. Park the vehicle in a designated area to minimise interaction with traffic and ensure it is on firm, level ground. Use appropriate signage or cones around the work vehicle to enhance visibility and alert other road users of your presence. Ensure all personnel wear high-visibility clothing while working near traffic-prone areas. Engage in clear communication with clients regarding the work scope and duration upon arrival to ensure understanding and cooperation. Remain calm and professional if dealing with an uncooperative client, and attempt to address concerns without escalating tension. | 2M |

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK IN THE STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains a fective of must be reviewed (and revised if necessary) if relevant control measures are revised. The view process should be carried out in consultation with workers (including contractors of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU mast ensure that advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a rest of the review are advised of the changes in a way that will enable them to implement their duties and the involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | COMMENTS | |
|-------------------------------------------------------------------------------------------------|----------------|----------|--|
| | | | |
| The company details have been entered, including the project name and address. | | | |
| All relevant personnel consulted during the development of the SWMS. | | | |
| Name, signature, position and date signed of the person approving the SWMS. | | | |
| Specific personnel and qualifications, experience is noted in the SWMS. | 7 | | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | | | |
| Adequate risk assessment of any identified hazards has been completed. | | | |
| Foreseeable hazards are identified and documented for each step. | | | |
| Any hazards listed in any site risk assessments have been added to the SWMS | | | |
| SWMS initial risk (IR) column as well as residual risk (RR) column pupleted. | | | |
| Check control measures added to the SWMS are the most effective selections | | | |
| Responsible person is assigned and listed on the part the important control measures. | | | |
| Permit or licenses requirements specified, sur as Hot Work, Electric Work, Work at Heights etc. | | | |
| SWMS identifies plant and equipment to be us | | | |
| Details of inspection checks required for any equipment listed an inoted on the SWMS. | | | |
| Describes any mandatory qualifications, experience, and or skills required to perform the work. | | | |
| Applicable personal protective equipment is selected on the SWMS. | | | |
| Reflects and documents any legislative references and/or Australian Standards. | | | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | | | |
