Adhesive Spraying SAFE WORK METHOD STATEMENT (SWMS)										
TASK OR ACTIVITY: Adhesive Spraying										
Business Name: [Company Name]		ABN: [ABN]	SWMS#							
Business Address: [Company Address]										
Contact Person:	Phone: [Phone]	E ail:								
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P OF THE PROJECT								
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (K 3U) is	required to ure at a safe work method s	tatement (SWMS) is prepared before							
Full Name:										
Signature:		Title:	Date:							
Details of the person(s) responsible for ensuring implementation, monitoring a second	ompliance of the SWMS well as review	s and modifications of the SWMS.								
Full Name:		Title:	Phone:							
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N TE AND DATED SIGNATURE OF A	LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND							
Safety meetings or toolbox talks will be sched and in accordance with regislative requirements to first identify any site hazards, condition of a those hazards and then to further take steps to either condition of a hazard.	NAME	SIGNATURE	DATE							
If an incident or a near miss occurs, all work must structure nately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.										
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.										
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Improper ventilation, tripping over cables	2М	 Ensure the workspace is thoroughly ventilated before starting work. If possible, use open-air environments or well-ventilated facilities. Space out equipment and remove any unnecedentry items clutters to avoid tripping over cords or cables. Use safety mats or cable covers to encase us running cables across walking paths or high traffic areas. Keep all working areas clearened free of any detect that materiause tripping or slipping hazards. Clearly label and togote check off ventilation systems for functionality to ensure they are in a woung orden. Incorporate wullar breatowithin tas extra minise prolonged exposure to potential tripping or contact with adhesives. Use a neal productive equipment (PPE), like safety goggles, masks and gloves, to gual tagenest dire inhalation or contact with adhesives. Encourge workers to port any unsafe conditions, such as blocked ventilation tlets, incorporate stored cables, or any other potential risks. Course thorough induction or briefing about the workplace layout and the focations would ventilate in systems and potential tripping hazards. Incurrent thorough induction or briefing about the workplace layout and the focations would ventilation systems and potential tripping hazards. Enforce safety procedures, like not overloading power outlets and ensuring proper storage of cables when not in use. 	1L	
2. Checking Adhesive Equipment	Electric shock, chemical exposure	ЗН	 Regularly inspecting equipment before use, check for any visible damage or malfunction that may lead to electric shocks. Implement a routine maintenance schedule carried out by trained professionals to ensure the equipment remains in safe working condition and reduce the risk of electric shock. Ensure workers wear necessary personal protective equipment (PPE) such as safety gloves, non-conductive footwear and eye protection to guard against electric shock. Always disconnect electrical equipment from power sources when not in use or during maintenance procedures, minimising risk of accidental electric shock. Encouraging frequent hand washing and avoiding touching face to prevent chemical exposure, particularly after handling the adhesive supplies. Providing effective ventilation in work areas to minimise inhalation of potentially harmful chemical fumes released during adhesive application. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			- Maintaining a clean work environment can help prevent accidental exposure to chemicals. Immediately clean up any spills to reduce risk.		
			- Training staff in the correct procedure of handling mesives in order to limit their exposure to potential health risks.		
			- Properly store adhesives to prevent uninterional contactor spillage. All containers should be labelled correctly with safety information.		
			- Keeping first aid kit and emergency eye wash wons accessible at all times, and ensure all employees know there these are local, and how use them.		
			- Ensuring all staff are aware or the Safety Data Shere (JS) associated with each type of adhesive the concrete, so they understand the potential hazards and emergency prevalues.		
			- Ensure that all parkets are trained in the correct procedure for mixing adhesive and hand, the parado an upstances.		
			- Use a vent centilate cerea to mix adhesive to help disperse potentially harmful fumes.		
			Provide espirator masks that filter out chemical vapours to protect against innut tion of harmoni fumes.		
			Encourse workers to always use the provided respiratory protection equipment on mixing adhesive.		
			- Supply appropriate personal protective equipment (PPE) including gloves, safety goggles, and coveralls.		
			- Enforce the compulsory wear of PPE while handling adhesives or any other hazardous substances.		
3. Mixing adhesive	Inhalation of harmful names, skin core ct with harmful substances	ЗН	- Maintain and regularly inspect the condition of PPE, replacing any damaged or ineffective equipment immediately.	2M	
			- Keep spill kits readily available should a spill or leak occur during the mixing process.		
			- Incorporate regular breaks during this task to limit exposure time to any potential harmful substances and fumes.		
			- If skin contact does occur, ensure immediate washing of affected areas with water and mild soap.		
			- Implement a system where only small amounts of adhesive are mixed at a time, reducing the amount of harmful substance present at any given time.		
			- Regularly maintain and check the equipment used for mixing to ensure it is in good working order.		
			- Provide information, instruction, training and supervision in relation to WHS so that workers can work in accordance with the SWMS.

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAF WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are revised if necessary) if relevant control measure are revised of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectines.			
Responsible person is assigned and listed on the SWMS for the impement of cont, measures.			
Permit requirements specified, such as Hot Wrap Electrical Work, Variat Heights etc.			
SWMS identifies plant and equipment to be upd.			
Details of inspection checks required for any equipment listed ar noted on the SWMS.			
Describes any mandatory qualifications, experience reining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
