

Applying Putty To Secure Glass | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Applying Putty To Secure Glass

Business Name:	ABN:	SWMS#
Business Address:		
Contact Person:	Phone:	Email:

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:		
Signature:	Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS as well as reviews and modifications of the SWMS.		
Full Name:	Title:	Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

NAME OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Permit or Licenses Requirements

Mandatory Qualifications and Training

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Incorrect handling of equipment, Exposure to hazardous substances	3H	<ul style="list-style-type: none"> - Ensure all workers are trained in the correct handling techniques for tools and equipment. - Conduct a pre-work inspection of all tools to ensure they are in safe working condition. - Use personal protective equipment (PPE) such as gloves, goggles, and masks to prevent exposure to hazardous substances. - Store and label all hazardous substances properly according to safety guidelines. - Implement a ventilation system to minimize inhalation risks in enclosed spaces. - Make available Material Safety Data Sheets (MSDS) for all hazardous substances onsite. - Establish a clear procedure for reporting and responding to any spills or leaks of hazardous materials. - Limit access to areas where hazardous substances are in use to trained personnel only. - Keep emergency washing stations readily accessible in case of skin or eye contact with hazardous materials. - Educate workers on emergency procedures in the event of accidental exposure or equipment failure. 	2M
2. Installation area preparation	Trip or slip hazards, Accidental damage to property	3H	<ul style="list-style-type: none"> - Conduct a site inspection to identify any existing trip or slip hazards and document them. - Clear the immediate work area of debris, loose materials, and unnecessary tools that could pose a trip hazard. - Mark and barricade the work zone with appropriate signage to alert others to potential hazards. - Ensure proper lighting is available in the work area to help identify and avoid trip or slip hazards. - Use non-slip mats or covers if working on slippery surfaces or uneven ground. - Wear appropriate footwear with slip-resistant soles to reduce the risk of slipping. - Train all personnel on proper lifting techniques and safe handling practices to prevent accidental damage to property. - Protect surrounding areas with drop cloths or protective coverings to prevent accidental damage to floors or furnishings. - Identify and secure any fragile or valuable items near the work area before beginning the task. - Assign a safety officer or team member to monitor the site regularly for potential hazards and enforce safe work practices. 	2M
3. Selection of putty and tools	Potential for incorrect selection, Risk of cuts or injury from tools	2M	<ul style="list-style-type: none"> - Ensure all workers are trained in the selection and application of putty products. - Use gloves and appropriate personal protective equipment (PPE) to minimise the risk of cuts or injuries from tools. 	1L

- Use tools designed specifically for putty application, ensuring the task.

- Implement a sign-off procedure for supervisory approval of the work.

- Store different types of putty separately and clearly label them.

- Conduct a toolbox talk prior to starting the job to reaffirm correct injuries.

- Regularly inspect and maintain all tools used in putty application.

- Provide visual aids or samples of the correct putty to be used to

- Limit access to the putty storage area to authorised personnel.

- Keep a first aid kit on-site to address any potential minor injuries.

- Set up a dedicated workspace for tool and material preparation, free.

A large, light blue rectangular area with a grid pattern, overlaid with a large, diagonal, gray 'SAMPLE' watermark. The grid consists of thin white lines forming a 3x3 pattern of squares. The watermark is a large, bold, sans-serif font, tilted diagonally from the bottom-left towards the top-right. The background of the entire image is a light gray color.

EMERGENCY RESPONSE – CALL 000 FOR EMERGENCIES

Ensure to have an Emergency Management Plan in place as well as adequate numbers of trained first aid staff with easy access to fully stocked first aid kits, rescue equipment, material safety data sheets, adequate access to emergency communication equipment and fire-fighting equipment suitable for all classes of fire and ignition sources.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are revised. The review must be carried out in consultation with workers (including contractors and sub-contractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.	<input checked="" type="checkbox"/>	
All relevant personnel consulted during the development of the SWMS.	<input checked="" type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input checked="" type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input checked="" type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input checked="" type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input checked="" type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input checked="" type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	<input checked="" type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input checked="" type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input checked="" type="checkbox"/>	
Permit or licenses requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input checked="" type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input checked="" type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input checked="" type="checkbox"/>	
Describes any mandatory qualifications, experience, training or skills required to perform the work.	<input checked="" type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input checked="" type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input checked="" type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input checked="" type="checkbox"/>
