THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE POST THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ure at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditional talks.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Untrained personnel, misuse of tools	3H	 Conduct thorough training programs for all personnel, especially those who are newly recruited, highlighting safe operating procedure, and correct usage of plant machinery and tools. Regularly perform competency checks on a sonnel to ensure understanding and practical application of safety procedures. Ensure that only trained and competent person experate machinery, tools and devices in the asphalt plant. Implement stringent measure, that restrict untrain, or a authorised personnel from accessing hazar agrees, the plant. Devise a contrainensive of EWo Method Stament (SWMS) providing clear guidelines are if how each ask should be no armed to minimise potential risks. Ensurpropely ainterpace and routing inspection of all tools and equipment to keep us an optimal ording condition and prevent malfunctions that may lead to accide as. Use posted a guard on machinery whenever possible and promote the use of personal trotes be equipment (PPE) such as hard hats, safety glasses, work boots, a high isibility to othing. Estate the reakdown protocols, including steps to safely shut down machinery in use of machinetion. In ope emergency exit routes well marked and free from obstructions at all times to allow quick evacuation, if needed. Deploy qualified supervisors to observe worker engagement and enforce adherence to safety practices and rules. Regular audits can also help identify any deviations from safety compliance, allowing for prompt corrective actions. 	2M	
2. Equipment Check	Faulty equipment, improper handling	3H	 Regularly monitor and maintain all equipment to ensure it is in safe and serviceable condition. Use manufacturer's recommendations for safe usage of equipment and required maintenance procedures. Conduct regular inspections of the work area for potential hazards and immediately address identified problems. Provide extensive training sessions on proper handling and use of equipment to avoid mishandling. Ensure all safety guards or mechanisms are functioning correctly before using any equipment. Always use personal protective equipment (PPE) appropriate to the task at hand, including helmets, gloves, eye protection, high-visibility clothing etc. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Implement a system of reporting and fixing faults as soon as they are recognised; never permit workers to continue using faulty equipment. 		
			- Keep the work zone free from unnecessary items—debris— clear areas can minimize the potential occurrence of an accident de to improper handling.		
			- Limit the amount of people within the oper onal proxim of equipment to strictly necessary personnel only. This minimises ris expos		
			- Use signage or barriers to outline the active waying areas where heavy machinery is being used.		
			- Ensure that everyone ensite unerstands emergent vocols in case of accidents or equipment failure.		
			- Adopt a "zz wolerance" pacy for tuse or use of the equipment, which could lead to misha, accident or unwarra quipment damage.		
			- If we as notice process and or vibration in the equipment, cease operation and reperson the supervisor immediately.		
		Regula Risk ssessment: The risk assessment of materials should be done rularly a min. The the exposure to harmful substances.			
			- Pel, a Protective Equipment (PPE): Workers must wear PPE, such as masks, loves a piveralls when inspecting materials to protect skin from contact with entially harmful substances.		
			- Sure Work Procedures: Establish safe work procedures that minimise or eliminate exposures to chemicals.		
			- Training: Regularly train workers about potential risks and the correct handling of materials that might release harmful chemicals.		
Material Inspection	Inhalation of harmful chemicals, sk	4A	- Ventilation: Ensure adequate ventilation in the working area to prevent inhalation of harmful vapours or dusts.	2M	
or material mepocation	contact with harmful sub		- Spill Prevention & Response: Have a proper system in place for managing spills to reduce the risk of contact with harmful substances.		
			- First Aid Facilities: Ensure the presence and awareness of suitable first aid facilities for emergencies.		
			- Storage Guidelines: Proper handling and storage of hazardous materials, including correct packaging and labelling.		
			- Health Monitoring: Implement regular health monitoring programs to ensure that workers are not being exposed to harmful levels of substances.		
			- Hygiene Practices: Promote personal hygiene measures like washing hands after handling harmful substances.		
			- Exposure Limits: Adhere to exposure standards and limits for harmful chemicals.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P A	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWI			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imperent of contameasures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vorat Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed approted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
