Backhoe Attachment	ts SAFE WORK METHOD	STATEMENT (SWMS)									
TASK OR ACTIVITY: Backhoe Attachments											
Business Name: [Company Name]		ABN: [ABN]	SWMS#								
Business Address: [Company Address]											
Contact Person:	Phone: [Phone]	E ail:									
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE P. J OF THE PROJECT									
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (r. 3U) is	required to sure at a safe work method s	tatement (SWMS) is prepared before								
Full Name:											
Signature:		Title:	Date:								
Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, well as reviews and modifications of the SWMS.											
Full Name:		Title:	Phone:								
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A	LL RELEVANT PERSONNEL WHO HAVE B OPMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND								
Safety meetings or toolbox talks will be sched ed in accordance with egislative requirements to first identify any site hazards, conduct or unical those hazards and then to further take steps to either the sched or control eater hazard.	NAME	SIGNATURE	DATE								
If an incident or a near miss occurs, all work must study unately. Depending on the severity of the incident, a meeting will be called with all workers to amend											
the SWMS if required. The meeting may also be an educational opportunity.											
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.											
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be											
kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Trip and fall, improper use of tools	2М	 Implement a site induction for all personnel to familiarise them with potential tripping and fall hazards present on the worksite. Incorporate regular safety briefings focusing or ne proper use of backhoe attachments, as well as addressing other provided risks related to this task. Create a site-specific risk assessment, prioring biomisk activities like loading and unloading machinery or working near utility. Develop instructions for encryvees regarding samperation and usage of equipment, improving overall competency among on tational provided risks and the provided risk activities like loading and unloading machinery or working near utility. Keep walkways of work treases are and clean to prevent tripping hazards. Ensure appropriate single is in prove to have use any digment (PPE) that might include sturded ork both hardwars, gloves, are might visibility clothing to mitigate the risk of injury to get the unprocess. Empth size regulared inspection and maintenance. This would ensure tools used are in grad when get using a continuing and and safe for use. Stable, reliable system of communication on site, to ensure that potentially aradous conditions can be immediately reported and addressed. Onsider the physical capabilities of workers before assigning jobs. Avoid having hexperienced or physically incapable individuals handle heavy machinery or complex tasks. Allocate sufficient rest breaks to prevent fatigue, which could lead to accidents due to lack of focus or carelessness. If possible, automate dangerous tasks to reduce worker exposure to hazards. Regularly review and update your safe work method statement (SWMS) so it remains an effective team reference guide for managing and controlling identified hazards. Employ traffic management measures when heavy machinery is in use to protect both workers and motorists passing by the site. 	1L	
2. Attach backhoe	Misoperation due to inexperience, equipment failure	3H	 Provide proper training and regularly assess workers on their operating skills to ensure they are equipped to handle the backhoe attachments effectively. Establish a regular maintenance schedule for the backhoe to prevent any potential equipment failure. Develop and enforce a pre-use inspection procedure to identify any safety issues before commencing work. 	1L

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Ensure all workers involved in the operation are utilizing appropriate personal protective equipment (PPE) such as gloves, hard hats, steel-toe boots, high visibility vests, etc. Implement use of machine guards and other usery devices to protect against hazards that may emerge during operation Enforce strict compliance with standard opsinting procedures (SOPs) and codes of 		
			 practice for operating backhoe attachments. Allocate tasks based on a norker's competency of experience level to minimize risk associated with misoperation due to inexperience. 		
			- Make sure emerge system on second end and understood by the employed involves in the tast		
			- Utilize warm, usigns and varricades to the working area to keep unauthorized personal at a strength ce.		
			- Prone to culture creporting near misses or any perceived risks - big or small, instant ctile should be taken to rectify reported issues.		
			- Mainta a company derly work environment to reduce unwanted incidents.		
			 ke realiar by ks to prevent operator fatigue which can lead to errors and accidents 		
			Regular colbox talks should be performed to refresh worker's knowledge about so ty controls and to discuss any upcoming tasks and potential hazards.		
			- Carry out comprehensive pre-use checks on the backhoe attachment focusing on any signs of wear, tear, or damage.		
			- Use only well-maintained equipment which has been serviced according to the manufacturer's instructions and schedule.		
			- Have a trained mechanic on-site or easily reachable for immediate correction of identified faults to prevent equipment failure.		
3. Check functionality	Equipment failure, unguarded parts	ЗH	 Inspect and verify safety guards are in place and working properly before starting work to protect against unguarded parts. 	2M	
			- Ensure all workers operating the backhoe have undergone proper training and are competent in recognising and responding to potential issues.		
			- Implement a system which necessitates regular inspection and maintenance of the backhoe attachments.		
			- Install clear, visible signage around areas where backhoes are being used to warn others of potential hazards.		
			- Control access to the work zone. Only necessary personnel who are aware of the potential hazards should be allowed near the operating backhoe.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAL WO A STHUD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to revised if necessary) if relevant control measure are revised if necessary) if relevant control measure are revised of the SWMS and their health and safety representatives who reworkplace.

ke sure it remains effective and must be reviewed (and are subcontractions) who may be affected by the operation sentatives who received that work group at the

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- 1. Spot Checks.
- 2. Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.			
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effectines.			
Responsible person is assigned and listed on the SWMS for the impement of cont, measures.			
Permit requirements specified, such as Hot Wrap Electrical Work, Variat Heights etc.			
SWMS identifies plant and equipment to be upd.			
Details of inspection checks required for any equipment listed ar noted on the SWMS.			
Describes any mandatory qualifications, experience reining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
