

Balloon Screen Printer | SAFE WORK METHOD STATEMENT (SWMS)

TASK OR ACTIVITY: Balloon Screen Printer

Business Name: [Company Name]

ABN: [ABN]

SWMS#

Business Address: [Company Address]

Contact Person:

Phone: [Phone]

Email:

THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:

Title:

Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:

Title:

Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

NAME

SIGNATURE

DATE

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

CLIENT OR PRINCIPAL CONTRACTOR DETAILS

RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			Elimination Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	Substitution Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	Isolation Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	Engineering Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	Administrative Change the work. PPE

Notes on Hierarchy of Controls: Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
											
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips, trips and falls , Unsecured equipment	2M	<ul style="list-style-type: none"> - Ensure that the work area is clean and free from any clutter or debris that could contribute to slips, trips, and falls. - Regularly inspect the workspace for potential hazards, such as spills or uneven surfaces, and address them immediately. - Set up appropriate signage in areas where there may be an increased risk of slips or trips, such as wet floor signs near spillages and warning signs near uneven surfaces or cables across walkways. - Install non-slip flooring in high-traffic areas where possible or use anti-slip footing materials such as rubber mats or non-slip paint to minimise the risk of slipping. - Encourage workers to wear appropriate footwear with slip-resistant soles. - Educate and train employees on how to recognise potential hazards and maintain a safe working environment through proper housekeeping practices. - Ensure that all equipment used in the balloon screen printing process, such as screens, squeegees, and ink containers, are securely stored when not in use, preventing accidental movement or toppling. - Implement proper storage solutions for all equipment and materials, including well-organised shelves, cabinets, or racks. - Regularly check that all equipment is functioning correctly and adheres to safety standards. Promptly schedule maintenance or repairs for any identified issues. - Provide adequate lighting to ensure visibility and prevent any potential tripping hazards due to inadequate illumination. - Implement a system for reporting and addressing hazards or near-miss incidents promptly, emphasising that everyone has a role in maintaining a safe workplace environment. 	1L	
2. Equipment Setup	Electrical hazards, Pinch points	3H	<ul style="list-style-type: none"> - Ensure all electrical equipment is tested and tagged regularly by a qualified electrician to verify its safe operation and compliance with relevant Australian standards. - Set up a designated area for the Balloon Screen Printer that is dry, well-ventilated, and free from any flammable materials, water sources or dampness to minimise electrical hazards. - Provide workers with appropriate personal protective equipment (PPE), such as rubber-soled shoes and insulated gloves, to protect them from potential electrical shocks during equipment setup and use. - Make sure the Balloon Screen Printer is placed on a stable, flat surface to prevent accidental tipping or movement that could lead to injury or damage. - Train workers on how to properly set up and operate the Balloon Screen Printer to minimise the risk of any mishaps and ensure they are aware of any specific hazards related to the equipment. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> - Clearly label and identify pinch points on the Balloon Screen Printer, using warning signs and instructions to avoid any injuries during equipment setup and operation. - Conduct regular maintenance and inspection of the Balloon Screen Printer to ensure all moving parts are functioning smoothly, minimising the risk of any pinch point injuries. - Encourage workers to adopt ergonomic practices during equipment setup, such as bending at the knees when lifting heavy items and taking breaks to stretch when standing for long periods. - Implement an emergency stop button or switch on the Balloon Screen Printer that is easily accessible to workers in case of any unforeseen hazards or accidents. - Develop and enforce a lockout/tagout procedure for the Balloon Screen Printer to ensure the equipment is properly shut down and inaccessible during maintenance, repair or cleaning. - Organise any related cables, cords, or hoses neatly and securely to minimise trip hazards and reduce the risk of entanglement during equipment setup and operation. - Establish a comprehensive incident reporting system to ensure all workplace accidents, incidents, and near misses are promptly identified, reported, and addressed to prevent future occurrences. 		
3. Ink Mixing	Chemical spills, Skin irritation	2M	<p>Proper Training: Ensure that all the employees involved in ink mixing are adequately trained on the appropriate procedures, including safe handling and storage of chemicals.</p> <ul style="list-style-type: none"> - Personal Protective Equipment (PPE): Provide appropriate PPE, such as gloves, goggles, and aprons, to all employees handling ink and chemicals to protect against skin irritation and any potential spill hazards. - Chemical Storage: Store all chemicals and inks in designated containers with clear labels, ensuring they are tightly sealed to prevent spills and leaks. - Ventilation: Provide adequate ventilation in the workspace to minimise the risk of inhaling volatile fumes from the ink and chemicals during the mixing process. - Spill Containment: Utilise a designated spill containment area to contain any accidental spills immediately and prevent them from spreading. - Emergency Response Plan: Develop and implement an emergency response plan addressing chemical spills and skin irritation incidents, including proper communication channels and immediate actions to be taken. - Equipment Maintenance: Keep all equipment used during the ink mixing process in good working order, performing regular checks and maintenance to reduce the likelihood of spills or other incidents. - Hazardous Waste Disposal: Establish a proper disposal system for hazardous waste material, such as unused or contaminated ink, by following environmentally friendly guidelines and regulations. 	1L	

		- Supervision and Monitoring: Supervise the ink mixing process closely to ensure that employees are following the standard operating procedures at all times. Regularly review and update these measures as needed to improve workplace safety.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
