THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PL OF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (N 3U) is	required to ture at a safe work method s	tatement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	ompliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED	N. 1E AND DATED SIGNATURE OF A CO. MUNICATED TO IN THE DEVELO	LL RELEVANT PERSONNEL WHO HAVE BI PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched ed in accordance with agislative requirements to first identify any site hazards, conditions those hazards and then to further take steps to either the conditions of the conditions are or conditions.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must standardly. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Inadequate training, Electrical faults	2M	 Provide adequate training and competency assessment to all operators before they commence work with the Bench Grinder. This should lover proper usage, maintenance, and emergency procedures. Implement a formalised induction procedure for new operators to ensure they understand their responsibilities under Austrain Works are Health and Safety legislation. Ensure that all electrical equipment, including the Bench Grinch, power cables, and outlets, are regularly inspected and tested by qualified electrician in accordance with AS/NZS 3760 to service safety instruction and testing of electrical equipment). Establish a coventative reintenancy schedule of identify and rectify any potential electrical faurour mechanism issues in a Bench Grinder before they become hazar its. Make is a that a cower cords, plugs, and sockets are free from damage, wear, and ter is place an adamaged components immediately to prevent electrical malfuncions. Verify in at the conch Grinder is properly earthed during every usage to minimise thin is keep objective, shock. Instalm propropriate Residual Current Device (RCD) in the power distribution in term to provide additional protection against electrical faults and shocks. Conduct a Job Hazard Analysis (JHA) prior to commencing any work with the Bench Grinder, ensuring that all staff members understand and are aware of the hazards associated with the task. Implement clear signage and instructions on the correct usage of the Bench Grinder in easily visible locations. Encourage open communication among employees, supervisors, and other team members to quickly address any questions or concerns about operating the Bench Grinder safety. Provide and enforce the use of appropriate Personal Protective Equipment (PPE) such as safety glasses, gloves, and ear protection while working with the Bench Grinder. Regularly inspect and maintain the condition of PPE to ensure optimal effectiveness. 	1L	
2. Machine Inspection	Missing or damaged guards, Tool storage hazards	3Н	 Regular inspection and maintenance schedules: Implement routine inspection and maintenance of the bench grinder to ensure all parts are functioning properly, including proper attachment of safety guards. Staff training and awareness: Educate workers on the importance of using bench grinders correctly, including proper use of guards and tool storage. Provide refresher courses as necessary. 	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON	
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON	
			- Hazard reporting system: Establish a system for workers to report potential hazards or concerns regarding the bench grinder immediately, ensuring prompt attention and resolution.			
				- Correct tool storage facilities: Designate approvate storage facilities for tools related to the bench grinder to prevent accional contact with sharp edges or improperly stored equipment.		
			- Adequate signage and labelling: Install clear, warning signs and labels on or near the bench grinder, outlining proper usage government that it is a signage and labels on or near the bench grinder, outlining proper usage government.			
			- Ensuring the correct Personal rotective Equipme (PP). Require workers to wear appropriate PPT has a gles, gloves, and vective clothing while operating the beauty grino.			
			- Regularly of the k and replace damage gurant. Schedule periodic checks to ensure that guards are place of functioning vectly. Replace missing or damaged guards soon of the place of the control of the place of the control of the place of the control of the place o			
			- Isola g mage achines: If a bench grinder is found to have any issues during inspect in, in rediate isolate the machine and notify relevant personnel to address the issu			
			ily prouse in sections: Require workers to conduct a brief inspection of the bendering ler before each use, checking for missing or damaged guards and other byious ands.			
			- oper disposal of damaged tools: Implement a system for disposing of damaged or inserviceable bench grinder components, including guards, in a safe and efficient manner.			
			- Conduct a thorough risk assessment to identify and select the appropriate PPE for the tasks being performed with the bench grinder.			
			- Ensure that all selected PPE complies with Australian Standards and relevant codes of practice at the workplace.			
			- Provide specific training on the proper usage, inspection, maintenance, storage, and disposal of all required PPE to members of the team using the bench grinder.			
Personal Protective Equipment (PPE)	Incorrect PPE selection, Damaged PPE	2M	- Implement a documented PPE inspection programme at regular intervals, ensuring all PPE is checked for damage, wear and tear, and effectiveness.	1L		
Selection			- Store PPE in a designated area, away from direct sunlight, high humidity, chemicals, or other contaminants.			
			- Clearly communicate the mandatory PPE requirements for bench grinder usage, using appropriate signage, toolbox talks, and safety inductions.			
			- Establish and enforce the policy refusing entry to the work area for any personnel lacking appropriate PPE, and institute disciplinary action if needed.			
			- Provide alternative PPE options for workers with allergies or sensitivities to specific materials (e.g., latex gloves).

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Tollow any sale work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P A	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWI			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting sections.			
Responsible person is assigned and listed on the SWMS for the imperent of contameasures.			
Permit requirements specified, such as Hot Work, Electrical Work, Vorat Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed at noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
Identifies any hazardous substances used with specific control measures in line with any SDS.
