

Bun Divider S	AFE WORK METHOD STAT	EMENT (SWMS)	
	TASK OR ACTIVITY: Bun Divide	r	
Business Name: [Company Name]		ABN: [ABN]	SWMS#
Business Address: [Company Address]			
Contact Person:	Phone: [Phone]	E fil:	
THIS SAFE WORK METHOD	STATEMENT IS APPROVED BY	THE PLOOF THE PROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduct the proposed work starts.	cting a business or undertaking (r 3U) is	required to ture at a safe work method s	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitoring a	compliance of the SWMS well as review	s and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS. ST HAVE THE FOLLOWING COMMUNICATED		LL RELEVANT PERSONNEL WHO HAVE B PMENT AND APPROVAL OF THIS SWMS	EEN CONSULTED AND
Safety meetings or toolbox talks will be sched and in accordance with agislative requirements to first identify any site hazards, conditions inical those hazards and then to further take steps to either the same or conditions are also hazard.	NAME	SIGNATURE	DATE
If an incident or a near miss occurs, all work must steam ately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slips and falls, improper lifting techniques	2M	 Provide adequate training for all employees on proper lifting techniques, to prevent injuries from improper handling of the bun divider. Implement a clean-as-you-go policy to ensure at any spills or debris are promptly cleaned up to minimise the risk of slips and task. Conduct regular inspections of the work are no idea a potential hazards and take corrective action when needed. Provide non-slip floor mats a bigh traffic areas a paround a bun divider to prevent slips and falls. Encourage employees a year so resistant footwear appropriate for the workplace environment. Clearly mark my unevers poring or the so in elevation with high-visibility paint or signal to reduce trip for ards. Instain the strails to rab bars in areas where balance may be compromised to assist upto eas in bintaining their footing. Ensure that the per lighting is installed and maintained in the work area, allowing noloye it to so notential hazards more easily. Instain the ployees on how to use equipment safely, including loading and nloading ans from the bun divider. stablish designated storage areas for all tools and materials to prevent them from becoming trip hazards. Schedule regular maintenance checks for the bun divider and other equipment to ensure they are in safe working condition, addressing any issues found immediately. Encourage open communication between employees and management to report any concerns about potential hazards or unsafe conditions. Develop an emergency response plan detailing procedures for incidents such as falls or injuries related to the bun divider, ensuring all employees are trained on the plan and know what to do in case of an emergency. Review the SWMS regularly, updating it as necessary to address any new hazards or control measures identified in the course of work, and communicate these updates to all relevant employees. 	1L	
2. Load bun divider	Crushing injuries, pinch points	3Н	 Proper training: Ensure all workers operating the bun divider have received adequate training in safe operation of the equipment and are aware of the hazards associated with loading the bun divider. Inspection of equipment: Before use, conduct a thorough inspection of the bun divider to identify and address any potential risks, such as damaged or worn parts that may cause pinch points or crushing. 	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Safety guards: Make sure all safety guards and barriers are in place and functioning correctly to protect workers from coming into contact with moving parts during the loading process. Protective gloves: Require workers to wear are opriate protective gloves when handling buns for the divider, reducing the coof pinching or crushing injuries. Ergonomics: Design the workstation layout on manual that allows workers to load buns without having to reach or bend excessive mimising the risk of strain injuries related to awkward postures. Clear signage: Place warning one and labels on the broadwider, indicating dangers of pinch point and crushing areas, ensuring that workers stay alert and informed. Emergency ap controls: Insure the amenuncy stop controls of the bun divider are early accessible and orking proposed allowing immediate cessation of the equiper to sope intervent of a nazard. Regular to intend a perform periodic maintenance and cleaning of the bun divider mustain its oper functioning and reduce the risk of equipment issues leading won lace at slents. Immunity cation and supervision: Encourage open communication among team menuncy agarding safety concerns and incidents, and provide adequate upervision of ensure safe work practices are followed consistently. In ad limit adherence: Monitor the bun divider's load capacity and establish gunelines for how many buns can be safely processed at a time, preventing or repairing the bun divider, protecting workers from accidental energising of equipment. Incident reporting and follow-up: Establish a system for workers to report hazards or incidents related to the bun divider, and promptly address any safety concerns that arise. Continuous improvement: Regularly evaluate and update safety guidelines and training programs for the bun divider, incorporating new advancements in safety practices and technology as necessary. 		
3. Adjust settings	Machine entanglement, electrical hazards	2M	Regular equipment maintenance: Conduct periodic inspections and maintenance on the bun divider to ensure all components are in good working order and any issues are identified and remedied swiftly. Employee training: Provide comprehensive training and ongoing support for all employees tasked with operating the bun divider, ensuring they are familiar with the machine's settings and safeguards to prevent entanglement and electrical hazards. Clear signage: Display clear warning signs near the bun divider, alerting workers to potential hazards and reinforcing safe operating procedures.	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			 Power isolation: Employ lockout/tagout procedures during maintenance or cleaning to isolate the power source and prevent accidental activation of the machine, reducing the risk of electrical hazards and machine anglement. 		
			- Emergency stop buttons: Install easily access the emergency stop buttons at various locations around the bun divider, all lung operators to halt the machine instantly in case of an emergency.		
			- Protective clothing: Ensure all employees we equipment (PPE), such as gleves, long sleeves, d closed-to-closes, when working with the bun divider a reduce the risk of examples an injuries.		
			- Safety guards: Attack fety goods to the bun divide or key areas, such as around gear systems are noving ats, its revent accidental contact and minimise the risk of entanglement.		
			- Pre-shift che Require perators to form a pre-shift inspection and adjusting to the green order settings, confirming that the machine is ready for use and fully ining congilly to mitigate work-related hazards.		
			- Work, accorganist in: Maintain a well-organised and clutter-free workspace around a budivider reduce distractions and allow operators to concentrate lely of their tools.		
			- Eq. me t documentation: Keep a detailed log of any maintenance, repairs, or djusting made to the bun divider, helping to identify recurring issues and earline troubleshooting processes in the future. - Buakaway technology: Consider incorporating breakaway technology into the bun divider, which can detect abnormal force or resistance and automatically disengage		
			the machine to prevent accidents or damage.		
			- Thorough electrical inspections: Schedule regular inspections by a qualified electrician to verify that no worn out, loose or damaged electrical components are in the bun divider, thus preventing potential electrical hazards.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.			
Names and signatures of all relevant personnel consulted during the development of the SWMS.		P P	
Name, signature, position and date signed of the person approving the SWMS.			
Specific personnel and qualifications, experience is noted in the SWMS.	P		
Provides a step-by-step process of tasks required to carry out the activity or task.			
Adequate risk assessment of any identified hazards has been completed.			
Foreseeable hazards are identified and documented for each step.			
Any hazards listed in any site risk assessments have been added to the SWh			
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.			
Check control measures added to the SWMS are the most effecting so tions.			
Responsible person is assigned and listed on the SWMS for the imperent of continue assures.			
Permit requirements specified, such as Hot Work, Veralt Heights etc.			
SWMS identifies plant and equipment to be u d.			
Details of inspection checks required for any equipment listed are noted on the SWMS.			
Describes any mandatory qualifications, experience raining skills required to perform the work.			
Applicable personal protective equipment is selected on the SWMS.			
Lists any required permits or licenses.			
Reflects and documents any legislative references and/or Australian Standards.			
dentifies any hazardous substances used with specific control measures in line with any SDS.
