Details of the person(s) responsible for ensuring implementation, monitoring	compliant e of the SWIL as well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS VMS HAVE THE FOLLOWING COMMUNICATED	NA. 2 OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	IEL WHO HAVE BEEN CONSULTED AND (THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheduled in according ewith regislative requirements to first identify any site hazards, to continue to those hazards and then to further take steps to either eliminate or conditional leach hazard.			
If an incident or a near miss occurs, all work must stead dately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Slips, trips and falls, Inappropriate clothing	2M	 Conduct a site assessment to identify any cleven ground or obstacles that may cause slips, trips, and falls. Ensure all workers wear appropriate non-sit for clear to reduce the risk of slipping. Clear pathways and worke has of debris, equament, and core potential trip hazards before starting herding activities. Use signage or but a clear mark any hazard as areas that cannot be immediately addressed. Provide addressed lighting areas there can merding will occur during low light conditions to ensure visibility of pointial hazary. Ensure workers are used in the safe use of any tools or equipment they will use during preparation to preve a cidents ususe leading to falls. Establish are route for moving cattle that minimise steep inclines or rough terrain to reduce tripping risks. Inaquire vorkers of wear long pants and long-sleeved shirts to protect against environmental hazards white of binstricting movement. Advise waring hats or caps with neck flaps to provide sun protection while allowing clear vision without on truction. Recommend layered clothing that is suited to the weather conditions to prevent overheating or chill without restricting movement. Instruct workers on maintaining three points of contact when mounting or dismounting vehicles or equipment used in the herding process to prevent falls. Perform regular inspections and maintenance on vehicles and equipment used during the herding operations to ensure all features such as steps and handrails are secure. 	1L
2. Animal Assessment	Animal aggression, Inadequate knowledge of animal behavior	ЗН	 Conduct regular training and refresher courses for all workers on animal behaviour to enhance their understanding and handling skills. Implement a buddy system where experienced staff mentor less experienced workers, facilitating knowledge transfer and reducing the risk of accidents. Use personal protective equipment such as helmets, gloves, and reinforced boots to provide physical protection against animal aggression. Develop and enforce standard operating procedures that outline safe practices for interacting with cattle, including maintaining a safe distance. Assess each animal's temperament and previous history of aggression before engaging in herding activities, using this information to plan safer handling techniques. 	2M

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Install proper signage around cattle areas to remind workers and visitors of potential risks and safety protocols to follow.	
			- Ensure all workers carry communication devices two-way radios to quickly call for assistance if an aggressive animal poses a threat.	
			- Maintain secure fencing and gating systems to prevent attle from escaping or charging at workers, ensuring containment at all times.	
			- Utilise low-stress stock handling techniques the use the natural instincts of cattle to move them gently and calmly, minimising stress and reducing aggression.	
			- Restrict access to the cattle at to authorised per people coming in the with title.	
			- Regularly recew and upone risk a ressment to incorporate new learnings and experiences related to cattle behavior and injures.	
			- End ange reporting of all incidents of animal aggression to evaluate the causes and implement preventable mean as effectively.	
			- Conduct region inspections and maintenance of all equipment to ensure they are in good working addition. - Process aining for workers on the proper use and handling of all equipment to prevent misuse.	
			se only equipment that is designed for cattle herding and ensure it meets safety standards and regulations.	
			Implement a pre-use checklist for workers to follow before operating any machinery or equipment.	
3. Equipment Check	Malfunctioning eq ment se of equipment	3H	 Install protective guards or safety features on equipment to minimise the risk of injury from moving parts. Ensure personal protective equipment (PPE) such as gloves, boots, and helmets is available and used by workers at all times when handling equipment. 	2M
			- Keep a record of equipment maintenance checks and repairs to track the history and identify recurring issues.	
			- Establish emergency procedures in case of equipment malfunction and communicate these procedures to all workers.	
			- Supervisors should conduct routine spot checks to ensure workers are adhering to safe equipment use practices.	
			- Prohibit the use of faulty or damaged equipment until necessary repairs have been completed and verified.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK IN 'THIS 'S' ITEM ON MONITORING AND REVIEW

The SWMS must be reviewed regularly to make sure it remain effect, and must be reviewed (and revised if necessary) if relevant control measures are revised. The view as should be carried out in consultation with workers (including contractors as unputractors of the SWMS and their health and safety registeratives who represented that work group at the workplace.

When the SWMS has been revised the PCBD mest ensure the advised that a revision has been made and how they can accept the revised SWMS, including all persons who will need to change a work procedure or system as a remotified the review are advised of the changes in a way that will enable them to implement their duties the thing with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

- Spot Checks.
- Consultation with workers, contractors and sub-contractors.
- 3. Internal audits on a continual basis

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.	7	
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.		
Any hazards listed in any site risk assessments have been added to the SV 5.		
SWMS initial risk (IR) column as well as residual risk (RR) column ampleted.		
Check control measures added to the SWMS are the most effer ve secutions.		
Responsible person is assigned and listed on the splenetation of control measures.		
Permit or licenses requirements specified, so n as Hot Work, Electral Work, Work at Heights etc.		
SWMS identifies plant and equipment to be		
Details of inspection checks required for any equipment lister are noted on the SWMS.		
Describes any mandatory qualifications, experience, and or skills required to perform the work.		
Applicable personal protective equipment is selected on the SWMS.		
Reflects and documents any legislative references and/or Australian Standards.		
Identifies any hazardous substances used with specific control measures in line with any SDS.
