THIS SAFE WORK METHOD	STATEMENT IS APPRO		
Under the Work Health and Safety Regulation (WHS Regulation), a person condu the proposed work starts.		required to excert that a safe work method	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitorin $\gamma_{\rm e}$	compliance of the SWI, was well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS	NAME OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be schedued in according e with regislative requirements to first identify any site hazards, and the to control to those hazards and then to further take steps to either eliminate or control l each hazard.			
If an incident or a near miss occurs, all work must store and ately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Chemical exposure, Slips and Falls	4A	 Conduct a risk assessment prior to starting work to identify potential exposure points and assess risks. Provide appropriate personal protective exponent of E) such as gloves, goggles, face shields, and chemical-resistant aprons to all personnel ha title caustic soda. Ensure that Material Safet that a Sheets (MSD) for caust hodd are readily available at the worksite and reviewed by all personnel novolved in the tas. Establish a design exploring the awith good ventiletion or appropriate extraction systems to prevent the accumulation mames. Implement of containent threast as new as bunding or drip trays around the application area to capture spills as the preventile. Ensure that back and reviewed by all personnel handling caustic soda are trained in its safe use, including the proper handling, storage an dispone procedures. Insue that on -slip footwear and maintain housekeeping practices to manage any spills media and keep walkways clear. Restrict access to the application area during the preparation phase to authorised personnel only. Establish communication protocols to promptly report incidents or exposures and activate emergency response plans if needed. Use appropriate tools and equipment designed specifically for handling caustic soda to prevent accidental exposure or spillage. 	2M
2. Material Handling	Manual handling injuries, Spillages	ЗН	 Conduct manual handling training for all staff involved in the caustic soda application process to raise awareness of safe lifting techniques and correct postures. Use mechanical aids such as trolleys or forklifts whenever possible to transport heavy containers of caustic soda, minimising the risk of manual handling injuries. Properly label all containers of caustic soda with clear hazard warnings and handling instructions to prevent mishandling and accidental exposure. Ensure storage areas are well-organised and have sufficient space to facilitate easy and safe access to caustic soda containers, reducing the need for awkward or repetitive movements. 	2M

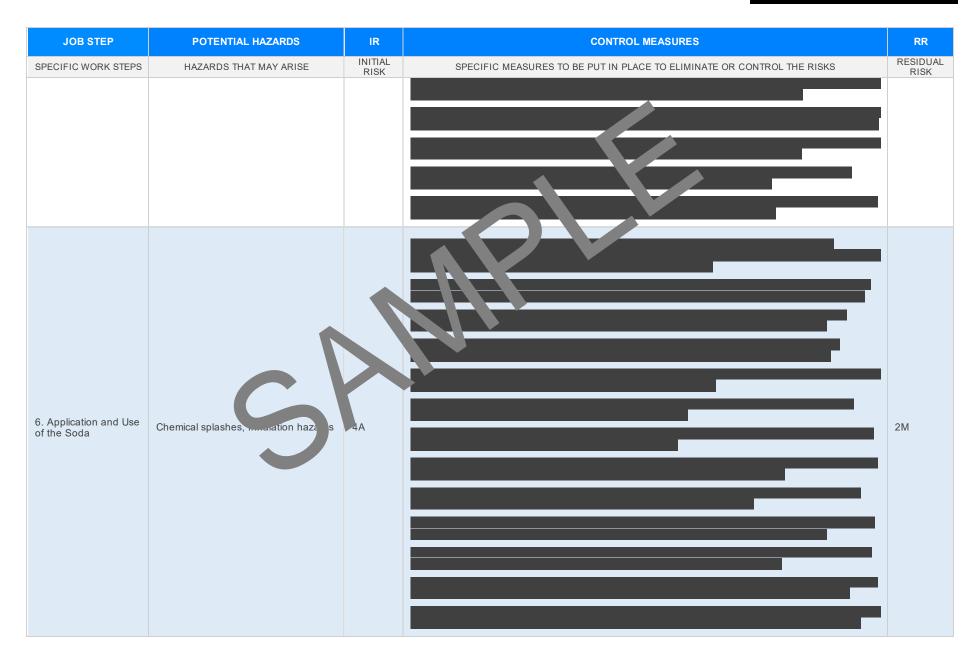

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
			- Implement a two-person lift policy for any loads above recommended safe weight limits, promoting teamwork and reducing strain on individual workers.	
			- Provide appropriate personal protective equipment (PPE), such as gloves and aprons, made from materials resistant to corrosive substances, ensuing employees are protected during handling.	
			- Establish spill containment kits and ensure they are ready accessible in all areas where caustic soda is handled or applied to quickly manage any sident cleases.	
			- Conduct regular maintenance checks on all exament used for caustic soda handling to ensure they are in good working order and to lace any that are unnout condity.	
			- Develop and enforce proceed, is for the immedia preventing spills using neutralising agents, preventing slip has used to be call exposure.	
			- Arrange remain ar safety due to practice embryancy response plans related to caustic soda spills and exposures, expuring all ecologies known at actions to take in case of an incident.	
			- Control, thorough inspection of all PPE before each use and check for signs of wear, damage, or defect	
			- Ensure that PPE musts Australian Standards and is appropriate for the specific task involving caustic	
			- Ven, the the correct type of gloves, goggles, and aprons are available and suitable for handling caustic oda.	
			- place any damaged or defective PPE immediately to maintain an adequate level of protection.	
			Train workers on the correct procedures for donning, doffing, and adjusting PPE to guarantee a proper fit and maximum safety.	
			- Store PPE in clean, dry, and accessible areas to prevent contamination and ensure readiness for use.	
3. PPE Inspection	Inadequate protect. Aproper us ge	2M	- Maintain a checklist of required PPE for tasks involving caustic soda to ensure nothing is overlooked during preparation.	1L
			- Educate workers about the consequences of inadequate protection and the importance of wearing the right equipment.	
			- Encourage regular feedback from employees regarding PPE effectiveness and comfort to continually improve safety measures.	
			- Implement a routine schedule for PPE maintenance and replacement based on manufacturer guidelines and usage frequency.	
			- Ensure the availability of additional or back-up PPE at the worksite to avoid work interruptions due to unexpected equipment failure.	
			- Monitor PPE usage closely and provide immediate corrective training if any improper practices are observed.

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK THE S ATEM AT MONITORING AND REVIEW The SWMS must be reviewed regularly to make sure it remain effect. and mu be reviewed (and The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are revised if necessary) if relevant control measures are revised. The s should be carried out in effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The view consultation with workers (including contractors person responsible for monitoring the effectiveness of the Safe Work Method Statement should ntractors nay be cted by the operation of the SWMS and their health and safety representatives who rep sented that work group at the employ a multi-faceted approach which includes but is not limited to: workplace. 1. Spot Checks. When the SWMS has been revised the PCBU must ensure the all versons involved with the work are 2. Consultation with workers, contractors and sub-contractors. advised that a revision has been made and how they can acce the revised SWMS, including all persons 3. Internal audits on a continual basis who will need to change a work procedure or system as a reof the review are advised of the changes in a way that will enable them to implement their duties ntly with the revised SWMS. All workers that An approach of continuous improvement, promptly recording inconsistencies or deficiencies, will be involved in the work must be provided with the relevant information and instruction that will assist followed up by immediate corrective action and consultation with all relevant personnel ensures them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the Sλ. S.	\boxtimes	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	\boxtimes	
Check control measures added to the SWMS are the most effective sections.	\boxtimes	
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	\boxtimes	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	\boxtimes	
SWMS identifies plant and equipment to be	\boxtimes	
Details of inspection checks required for any equipment lister are noted on the SWMS.	\square	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	\square	
Applicable personal protective equipment is selected on the SWMS.	\square	
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.
