

## Chemicals - Spills and Leaks | SAFE WORK METHOD STATEMENT (SWMS)

### TASK OR ACTIVITY: Chemicals - Spills and Leaks

Business Name: [Company Name]

ABN: [ABN]

SWMS#

Business Address: [Company Address]

Contact Person:

Phone: [Phone]

Email:

### THIS SAFE WORK METHOD STATEMENT IS APPROVED BY THE PCBU OF THE PROJECT

Under the Work Health and Safety Regulation (WHS Regulation), a person conducting a business or undertaking (PCBU) is required to ensure that a safe work method statement (SWMS) is prepared before the proposed work starts.

Full Name:

Signature:

Title:

Date:

Details of the person(s) responsible for ensuring implementation, monitoring and compliance of the SWMS, as well as reviews and modifications of the SWMS.

Full Name:

Title:

Phone:

ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS SWMS MUST HAVE THE FOLLOWING COMMUNICATED

NAME AND DATED SIGNATURE OF ALL RELEVANT PERSONNEL WHO HAVE BEEN CONSULTED AND COMMUNICATED TO IN THE DEVELOPMENT AND APPROVAL OF THIS SWMS

Safety meetings or toolbox talks will be scheduled in accordance with legislative requirements to first identify any site hazards, then to communicate those hazards and then to further take steps to either eliminate or control each hazard.

NAME

SIGNATURE

DATE

If an incident or a near miss occurs, all work must stop immediately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.

Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.

The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

## CLIENT OR PRINCIPAL CONTRACTOR DETAILS

## ANY HIGH-RISK CONSTRUCTION WORK BEING CARRIED OUT

<input type="checkbox"/> involves a risk of a person falling more than 2 meters.	<input type="checkbox"/> is carried out on or near pressurised gas mains or piping.
<input type="checkbox"/> is carried out on a telecommunication tower.	<input type="checkbox"/> is carried out on or near chemical, fuel or refrigerant lines.
<input type="checkbox"/> involves demolition of an element of a structure that is load-bearing.	<input type="checkbox"/> is carried out on or near energised electrical installations or services.
<input type="checkbox"/> involves demolition of an element related to the physical integrity of a structure.	<input type="checkbox"/> is carried out in an area that may have a contaminated or flammable atmosphere.
<input type="checkbox"/> involves, or is likely to involve, disturbing asbestos.	<input type="checkbox"/> involves tilt-up or precast concrete.
<input type="checkbox"/> involves structural alteration or repair that requires temporary support to prevent collapse.	<input type="checkbox"/> is carried out on, in or adjacent to a road, railway, shipping lane or other traffic corridor.
<input type="checkbox"/> is carried out in or near a confined space.	<input type="checkbox"/> is carried out in an area of a workplace where there is any movement of powered mobile plant.
<input type="checkbox"/> is carried out in/near a shaft or trench deeper than 1.5m or tunnel involving use of explosives.	<input type="checkbox"/> is carried out in areas with artificial extremes of temperature.
<input type="checkbox"/> is carried out in or near water or other liquid that involves a risk of drowning.	<input type="checkbox"/> involves diving work.

## ANY HIGH-RISK MACHINERY OR EQUIPMENT NEARBY

<input type="checkbox"/> Forklift	<input type="checkbox"/> Crane/s	<input type="checkbox"/> Hoist/s	<input type="checkbox"/> Excavator	<input type="checkbox"/> Backhoe/Loader	<input type="checkbox"/> Boom Lift	<input type="checkbox"/> EWP	<input type="checkbox"/> Genie Lift
<input type="checkbox"/> Trencher	<input type="checkbox"/> Drilling Rig	<input type="checkbox"/> Trucks	<input type="checkbox"/> Formwork	<input type="checkbox"/> Bobcat	<input type="checkbox"/> Flammable Gas	<input type="checkbox"/> Fuel	<input type="checkbox"/> Dozer
<input type="checkbox"/> High Voltage	<input type="checkbox"/> Mulcher	<input type="checkbox"/> Tilt-up Panels	<input type="checkbox"/> Roller	<input type="checkbox"/> Scissor Lift	<input type="checkbox"/> Tractor	<input type="checkbox"/> Other -	

## RISK MATRIX

LIKELIHOOD	INSIGNIFICANT	MINOR	MODERATE	MAJOR	CATASTROPHIC	SCORE	ACTION	HEIRARCHY OF CONTROLS
ALMOST CERTAIN	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4 ACUTE			<b>Elimination</b> Remove the hazard.
LIKELY	2 MODERATE	3 HIGH	3 HIGH	4 ACUTE	4 ACUTE	4A ACUTE	DO NOT PROCEED	<b>Substitution</b> Replace the hazard.
POSSIBLE	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	4 ACUTE	3H HIGH	Review before work starts.	<b>Isolation</b> Isolate People from the hazard
UNLIKELY	1 LOW	1 LOW	2 MODERATE	3 HIGH	4 ACUTE	2M MODERATE	Ensure control measures in place.	<b>Engineering</b> Isolate the hazard.
RARE	1 LOW	1 LOW	2 MODERATE	3 HIGH	3 HIGH	1L LOW	Monitor and keep records	<b>Administrative</b> Change the work. <b>PPE</b>

**Notes on Hierarchy of Controls:** Elimination methods are the most effective and preferred when controlling a hazard. Substitution is the second most effective method of controlling a hazard. Engineering by isolation is the third most effective, while Administrative Controls by changing the work is the fourth most effective method. PPE (Personal Protective Equipment) is the least effective method.

## PERSONAL PROTECTIVE EQUIPMENT (PPE)

FOOT PROTECTION	HAND PROTECTION	HEAD PROTECTION	HEARING PROTECTION	EYE PROTECTION	RESPIRATORY PROTECTION	FACE PROTECTION	HIGH-VIS CLOTHING	PROTECTIVE CLOTHING	FALL PROTECTION	SUN PROTECTION	HAIR/JEWELLERY SECURED
											
<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Select the appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

**Note:** A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS; and,
3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
1. Preparation	Slippery surfaces, Improper storage of chemicals	2M	<ul style="list-style-type: none"> <li>- Conduct a thorough risk assessment of the area and work site prior to beginning any tasks involving chemicals, identifying potential hazards and areas prone to spills or leaks.</li> <li>- Ensure that all workers are trained in chemical handling, storage, and emergency response procedures relevant to the specific substances they will be working with.</li> <li>- Utilise appropriate personal protective equipment (PPE) for workers exposed to hazardous chemicals, such as gloves, safety goggles, respirators and protective clothing.</li> <li>- Display clear signage in the work area indicating the presence of hazardous chemicals along with the appropriate hazard symbols and warnings.</li> <li>- Maintain up-to-date Material Safety Data Sheet (MSDS) for every chemical used in the workplace and ensure that it is readily accessible to all workers.</li> <li>- Organise proper storage solutions for chemicals, including secondary containment systems and spill kits, ensuring that incompatible materials are separated and stored accordingly.</li> <li>- Implement a regular inspection and maintenance programme for all chemical storage containers and equipment, checking for signs of damage, leaks, or wear.</li> <li>- Establish designated pathways and walkways within the work area to segregate foot traffic from areas where chemical spills and leaks could occur, using physical barriers or high-visibility markings when necessary.</li> <li>- Keep the work area clean and well-lit, promptly cleaning up any spills or leaks to prevent slip and fall accidents on slippery surfaces.</li> <li>- Develop and enforce strict protocols for the handling, transport, and disposal of chemicals, including procedures for dealing with spills, leaks, or other emergencies.</li> <li>- Ensure that emergency facilities, such as eyewash stations and showers, are installed in close proximity to the work area and are regularly inspected and maintained.</li> <li>- Provide ongoing communication and training for workers on hazard recognition, reporting, and response procedures related to chemical spills and leaks.</li> <li>- Review and evaluate the effectiveness of all control measures periodically, making improvements and adjustments as necessary to maintain a safe working environment.</li> </ul>	1L	
2. Site inspection	Inadequate containment systems, Flammable materials	3H	<ul style="list-style-type: none"> <li>- Conduct a thorough site inspection before starting any work to identify potential hazards related to chemical spills and leaks, including inadequate containment systems and the presence of flammable materials.</li> <li>- Ensure that all chemical storage areas are equipped with appropriate containment systems such as bunding walls, spill pallets, or other devices designed to capture and contain any leaked substances.</li> </ul>	2M	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Regularly inspect and maintain containment systems to address any signs of wear, tear, or damage that could result in a loss of containment in the event of a spill or leak.</li> <li>- Clearly label all containers and storage areas with the types of chemicals stored within, including their respective hazard classifications, to ensure proper handling practices are followed.</li> <li>- Establish designated secondary containment for chemical transfer operations to minimise the risk of accidental spills or leaks reaching vulnerable areas onsite, such as drainage systems or environmentally sensitive zones.</li> <li>- Implement effective inventory management practices to reduce the accumulation of excess or expired chemicals on site, which can contribute to an increase in flammable and hazardous material risks.</li> <li>- Enforce the use of appropriate personal protective equipment (PPE) for all workers handling chemicals, such as gloves, safety goggles, and chemical-resistant clothing, to minimise exposure risks in the event of a spill or leak.</li> <li>- Train all personnel in proper handling, storage, and disposal procedures for chemicals, emphasising the importance of avoiding spills and leaks and responding quickly in the event of an incident.</li> <li>- Develop and implement an emergency response plan detailing actions to be taken in the event of a chemical spill or leak, including steps to contain the incident, notify relevant authorities, and carry out clean-up processes.</li> <li>- Regularly review and update the Safe Work Method Statement (SWMS) to ensure it reflects current industry best practices and evolving legislation in regards to chemical management, spill prevention, and workplace health and safety requirements.</li> </ul>		
3. Opening containers	Splashing of chemicals, Exposure to hazardous substances	3H	<ul style="list-style-type: none"> <li>- Proper personal protective equipment (PPE): Ensure workers wear appropriate PPE such as safety goggles, gloves, long-sleeved clothing, and masks to protect themselves from splashing or exposure to hazardous substances.</li> <li>- Training and awareness: Provide regular training to workers handling chemicals to ensure they understand the potential hazards and know how to handle containers properly to minimise the risk of spills and leaks.</li> <li>- Proper handling tools: Use appropriate tools, such as bucket openers or drum wrenches to open containers safely and prevent accidental spills or leaks.</li> <li>- Use spill trays: Place containers on spill trays or containment pallets to catch any leaks or spills during the opening process.</li> <li>- Evaluate container integrity: Inspect containers for damage or signs of leakage before opening, and report any concerns to a supervisor immediately.</li> <li>- Ventilate the area: Ensure proper ventilation in the working area to reduce the risk of harmful fume exposure.</li> </ul>	1L	

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR	RESPONSIBLE PERSON
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK	NAME OF PERSON
			<ul style="list-style-type: none"> <li>- Follow standard operating procedures (SOPs): Clearly outline the approved methods for opening containers and handling chemicals to avoid accidents or inconsistent processes.</li> <li>- Environmental factors: Consider environmental factors, such as humidity, temperature, or surface conditions during the opening process, as these may affect the properties of the chemicals and their stability in the containers.</li> <li>- Material Safety Data Sheets (MSDS): Have a set of MSDS readily available for all chemicals being used, so that accurate information about the substances, their hazards, and proper handling procedures can be quickly accessed by employees.</li> <li>- Slow opening technique: Gradually open containers to prevent excessive pressure build-up, which may cause the chemicals to splash or spray.</li> <li>- Two-person opening technique: Implement a two-person system for opening larger or heavier containers, ensuring that one person supports the container while the other opens it carefully to minimise the risk of spills or leaks.</li> <li>- Spill response plan: Develop and implement a clear spill response plan to address any accidental chemical leaks or spills during the opening process, including training employees on the correct actions to take.</li> <li>- Emergency eye wash stations and safety showers: Install and maintain emergency eye wash stations and safety showers nearby for quick access in case of accidents.</li> <li>- Regular inspections and maintenance: Schedule routine inspections and maintenance tasks to assess container storage and handling procedures, ensuring that all practices contribute to a safe working environment.</li> </ul>

- Permits from local council
- Authorisation to commence work
- Any required documents.

## SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

## SAFE WORK METHOD STATEMENT MONITORING AND REVIEW

**The SWMS must be reviewed regularly** to make sure it remains effective and must be reviewed (and revised if necessary) if relevant control measures are needed. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

**The SWMS must be monitored regularly** for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to:

1. Spot Checks.
2. Consultation with workers, contractors and sub-contractors.
3. Internal audits on a continual basis.

An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles.

## SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	TO BE DONE	COMMENTS
The company details have been entered, including the project name and address.	<input type="checkbox"/>	<input type="checkbox"/>	
Names and signatures of all relevant personnel consulted during the development of the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Name, signature, position and date signed of the person approving the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Specific personnel and qualifications, experience is noted in the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Provides a step-by-step process of tasks required to carry out the activity or task.	<input type="checkbox"/>	<input type="checkbox"/>	
Adequate risk assessment of any identified hazards has been completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Foreseeable hazards are identified and documented for each step.	<input type="checkbox"/>	<input type="checkbox"/>	
Any hazards listed in any site risk assessments have been added to the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS initial risk (IR) column as well as residual risk (RR) columns completed.	<input type="checkbox"/>	<input type="checkbox"/>	
Check control measures added to the SWMS are the most effective solutions.	<input type="checkbox"/>	<input type="checkbox"/>	
Responsible person is assigned and listed on the SWMS for the implementation of control measures.	<input type="checkbox"/>	<input type="checkbox"/>	
Permit requirements specified, such as Hot Work, Electrical Work, Work at Heights etc.	<input type="checkbox"/>	<input type="checkbox"/>	
SWMS identifies plant and equipment to be used.	<input type="checkbox"/>	<input type="checkbox"/>	
Details of inspection checks required for any equipment listed are noted on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Describes any mandatory qualifications, experience, training, skills required to perform the work.	<input type="checkbox"/>	<input type="checkbox"/>	
Applicable personal protective equipment is selected on the SWMS.	<input type="checkbox"/>	<input type="checkbox"/>	
Lists any required permits or licenses.	<input type="checkbox"/>	<input type="checkbox"/>	
Reflects and documents any legislative references and/or Australian Standards.	<input type="checkbox"/>	<input type="checkbox"/>	
Identifies any hazardous substances used with specific control measures in line with any SDS.	<input type="checkbox"/>	<input type="checkbox"/>
