THIS SAFE WORK METHOD	STATEMENT IS APPRO	THE PC. OF THE ROJECT	
Under the Work Health and Safety Regulation (WHS Regulation), a person conduction the proposed work starts.	icting a business or under thing (Purly) is	required to entry that a safe work method :	statement (SWMS) is prepared before
Full Name:			
Signature:		Title:	Date:
Details of the person(s) responsible for ensuring implementation, monitorin	compliance of the SWI, was well as re	eviews and modifications of the SWMS.	
Full Name:		Title:	Phone:
ALL PERSONNEL PARTICIPATING IN ANY ACTIVITY ON THIS WMS	NALE OF ALL RELEVANT PERSONN EVELOPMENT AND APPROVAL OF	NEL WHO HAVE BEEN CONSULTED AND THIS SWMS	COMMUNICATED TO IN THE
Safety meetings or toolbox talks will be scheduled in according with regislative requirements to first identify any site hazards, and the to contract the those hazards and then to further take steps to either eliminate or contract leach hazard.			
If an incident or a near miss occurs, all work must store and ately. Depending on the severity of the incident, a meeting will be called with all workers to amend the SWMS if required. The meeting may also be an educational opportunity.			
Any changes made to the SWMS after an incident or a near miss must be approved by the Person Conducting Business or Undertaking and communicated to all relevant personnel.			
The SWMS must be kept and be available for inspection at least until the work is completed. Where a SWMS is revised, all versions should be kept. If a notifiable incident occurs in relation to which the SWMS relates, then the SWMS must be kept for at least two years from the occurrence of the notifiable incident.

JOB STEP	POTENTIAL HAZARDS	IR	CONTROL MEASURES	RR
SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK
1. Preparation	Incorrect equipment or improper use, Inadequate personal protection gear	2М	 Conduct a comprehensive risk assessment or identify potential hazards and define appropriate control measures. Ensure all equipment is well-maintained an encoded before use to prevent malfunction or failure. Provide thorough training for workers on the context operation of all tools and equipment used in seed collection. Supply and enforteneness of expropriate persons protective equipment (PPE) such as gloves, helmets, eye protection, all handless when orking at heights. Limit working yours and onforce regular neaks to minimise fatigue, reducing the risk of improper equipment uses are to dress. Establish slear computation protocols among team members, especially when coordinating activities from do end theight or areas. Use on your end and ested climbing gear designed specifically for canopy work and ensure it is suited the wight are tasks involved. Immene it strict procedures for checking weather conditions and postpone activities if adverse weather pould on sympses safety. It up exclusion zones to keep unauthorised personnel away from the work area to prevent accidents from occurring due to distraction or interference. Ensure emergency response plans are in place and understood by all workers, with specific processes for rescue operations in the event of an incident. 	1L
2. Equipment check	Equipment failure, Personal injury due to improper handling	ЗН	 Conduct routine maintenance on all equipment prior to use to ensure proper functioning and reduce the risk of equipment failure. Inspect ropes, harnesses, and other safety gear for any signs of wear or damage before commencing work. Ensure only trained and competent personnel operate equipment and perform checks to prevent mishandling. Use checklists for equipment inspection to standardise procedures and confirm no steps are missed. Provide training sessions on proper equipment handling and manual handling techniques to minimise injury risks. Implement a buddy system where a colleague confirms equipment checklist compliance to enhance safety. Equip workers with personal protective equipment (PPE) such as gloves, helmets, and eye protection. Set up exclusion zones to keep unauthorised personnel away from the work area, minimising distraction and potential accidents. 	1L

SPECIFIC WORK STEPS	HAZARDS THAT MAY ARISE	INITIAL RISK	SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS	RESIDUAL RISK														
			- Maintain clear communication among team members through radios or hand signals to coordinate actions and respond quickly in case of issues.															
			- Keep an emergency response plan in place, including first aid kits and contact information for emergency services, to address any incident swiftly.															
			 Ensure all personnel undertaking climbing to ks have completed certified training specific to working at heights and are competent in using climbing Conduct a pre-climb inspection of all climbing good including opes, harnesses, helmets, and carabiners, 															
			 to ensure they are in good condition and free from large. Establish a buddh yssen when a limbers work in pairs to monitor each other's safety and check each other's gear brane use. Implement a mict policy pat require process of personal protective equipment (PPE) such as helmets, glover ong skeres of appropriate potwear at all times during climbing activities. 															
	Risks of falls, Improper use of climbing gear		 Describe a sport on the ground who maintains visual contact with the climber and is equipped to communication up on trial hazards or emergency instructions. 															
3. Climbing training		4A	- Utilise, public ope chooling techniques for added security, ensuring that if one rope system fails, other in place to prevent falls.	2M														
			- Instant porary anchor points or use existing natural anchor points to secure climbers effectively, educing the risk of falls.															
																	- nduct a risk assessment prior to climbing to identify any environmental factors such as strong winds or wet conditions that could increase the likelihood of accidents.	
			- Limit the height of climbs according to the experience level of the climber and enforce height restrictions rigorously.															
			- Maintain a first aid kit easily accessible at the worksite and ensure that at least one team member is trained in administering first aid and CPR.															
			- Establish clear communication protocols among team members, including the use of hand signals or radio communication if verbal commands might not be heard.															
			- Review emergency procedures regularly, including rescue strategies in case of a fall, and conduct drills to ensure all team members are prepared for potential incidents.															
4. Ascending to canopy	Falls from height, Collisions with branches	4A		2M

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

Worker Name	Signature	Date

SAFE WORK THE S ATEM AT MONITORING AND REVIEW The SWMS must be reviewed regularly to make sure it remain effect. and mu be reviewed (and The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are revised if necessary) if relevant control measures are revised. The s should be carried out in effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The view consultation with workers (including contractors person responsible for monitoring the effectiveness of the Safe Work Method Statement should ntractors nay be cted by the operation of the SWMS and their health and safety representatives who rep sented that work group at the employ a multi-faceted approach which includes but is not limited to: workplace. 1. Spot Checks. When the SWMS has been revised the PCBU must ensure the all versons involved with the work are 2. Consultation with workers, contractors and sub-contractors. advised that a revision has been made and how they can acce the revised SWMS, including all persons 3. Internal audits on a continual basis who will need to change a work procedure or system as a reof the review are advised of the changes in a way that will enable them to implement their duties ntly with the revised SWMS. All workers that An approach of continuous improvement, promptly recording inconsistencies or deficiencies, will be involved in the work must be provided with the relevant information and instruction that will assist followed up by immediate corrective action and consultation with all relevant personnel ensures them to understand and implement the revised SWMS. that the PCBU is consistently developing ever-improving systems of safe work principles.

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

ITEMS WHICH MUST BE INCLUDED IN THE SWMS	COMPLETED	COMMENTS
The company details have been entered, including the project name and address.		
All relevant personnel consulted during the development of the SWMS.		
Name, signature, position and date signed of the person approving the SWMS.		
Specific personnel and qualifications, experience is noted in the SWMS.		
Provides a step-by-step process of tasks required to carry out the activity or task.		
Adequate risk assessment of any identified hazards has been completed.		
Foreseeable hazards are identified and documented for each step.	\boxtimes	
Any hazards listed in any site risk assessments have been added to the Sλ. S.	\boxtimes	
SWMS initial risk (IR) column as well as residual risk (RR) column completed.	\boxtimes	
Check control measures added to the SWMS are the most effective sections.	\boxtimes	
Responsible person is assigned and listed on the spiral of the spiral entry of control measures.	\boxtimes	
Permit or licenses requirements specified, so in as Hot Work, Electrical Work, Work at Heights etc.	\boxtimes	
SWMS identifies plant and equipment to be	\boxtimes	
Details of inspection checks required for any equipment lister are noted on the SWMS.	\square	
Describes any mandatory qualifications, experience, ang or skills required to perform the work.	\square	
Applicable personal protective equipment is selected on the SWMS.	\square	
Reflects and documents any legislative references and/or Australian Standards.	\boxtimes	
Identifies any hazardous substances used with specific control measures in line with any SDS.
