Select me appropriate PPE above suitable for the equipment used or the job task being performed (if applicable).

Note: A SWMS must be reviewed regularly to make sure it remains effective. A SWMS must be reviewed (and revised if necessary) if relevant control measures are revised. The review process should be carried out in consultation with workers (including contractors and subcontractors) who may be affected by the operation of the SWMS and their health and safety representatives who represented that work group at the workplace.

When a SWMS has been revised, the person conducting a business or undertaking must ensure all:

- 1. persons involved in the work are advised that a revision has been made and how they can access the revised SWMS;
- 2. persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS: and.
- 3. workers that will be involved in the work are provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS.

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON |
|---------------------|--|-----------------|---|------------------|--------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON |
| 1. Preparation | Trip Hazards, Exposure to harmful dusts | 2M | Ensure the work area is clear of any potential trip hazards before concrete screed preparation begins. Keep pathways, entryways, and clits clear at all times. Use cable protectors or similar solutions to monge any cords or hoses that may present a trip hazard. Workers should wear Personal Protective Entimer of PE), such as safety boots, high visibility vests, and hard hats that adhere in the trailian Standards. Regularly inspect, clean an anaintain equipment wolved in the process to avoid malfunction or sudden failure to brings around have does attuations. Eliminate or minitor of the mount of materials left orwine ground that could contribute to or lang trip in eards. Provide Trailing for emprovees on his transperly prepare and dispose of concernment in preparent unnecessal dust exposure Installar quate of tilation systems or utilise fans to disperse harmful dust particles during the process. Worker should wear sitable dust masks or respirators that meet the Australian and the whole ere's a probable exposure to harmful dusts. We are areas where potential dust can be produced to suppress it from ecoming roborne. courage workers to practice regular hand washing particularly after completing tasks that involve handling substances presenting dust exposure risks. Regularly monitor staff health especially those exposed to harmful dusts for early signs of related health concerns. Engage with staff regularly, urging them to voice out any safety concerns and ensuring they know their rights and responsibilities when it comes to Workplace Health And Safety. | 1L | |
| 2. Setting Up | Incorrect Manual Handling, Struck by moving object | ЗН | Frequent training sessions shall be conducted to educate workers about correct manual handling techniques such as lifting, carrying, and setting down loads safely. It is critical that the facility is well-organised, and that all equipment and materials are stored in their designated areas for safety. Ensure that all workers are provided with and utilise suitable Personal Protective Equipment (PPE) such as gloves, safety footwear and high visibility clothing. All employees should be instructed to report any unsafe conditions or practices immediately to their supervisor. Utilise mechanical aids and equipment like trolleys, forklifts or hoists whenever possible to minimise the risk associated with manual handling tasks. Implement an effective communication system that includes hand signals and warning alarms to alert nearby workers about moving objects. | 2M | |

| JOB STEP | POTENTIAL HAZARDS | IR | CONTROL MEASURES | RR | RESPONSIBLE PERSON |
|---------------------|---|-----------------|--|------------------|--------------------|
| SPECIFIC WORK STEPS | HAZARDS THAT MAY ARISE | INITIAL RISK | SPECIFIC MEASURES TO BE PUT IN PLACE TO ELIMINATE OR CONTROL THE RISKS | RESIDUAL RISK | NAME OF PERSON |
| | | | - Ensure that work area is cordoned off sufficiently while objects are being moved can also significantly reduce the likelihood of injuries caused by stray objects. | | |
| | | | - Regular breaks should be incorporated into the washedule, and strenuous physical activities should be rotated among works. | | |
| | | | - Maintaining a tidy work space, free from pontial obstrations or slip, trip and fall hazards. | | |
| | | | - Lastly, maintaining up-to-date first aid kits at we site locations at all times and ensuring every worker is brid about its location paramor | | |
| | | | - Ensure all workers are ned to the proper mixing procedures and safety protocols before any tas | | |
| | | | - Provide Provide Personal Equipm (E) such as gloves, boots, protective cloth changed and chask to preven skin and respiratory system from exposure to control dust. | | |
| | | | - Do no ally food or trink in the work area to prevent accidental ingestion of harmful hen als. | | |
| | | | Take see wolkers wash their hands thoroughly with soap and water after handling collecte. | | |
| | | | Utilize or noise machinery, where possible, to reduce the risk of damage to kers' hearing. | | |
| | | | - Mandate the use of earplugs or earmuffs when working in excessive noise conditions. | | |
| 3. Mixing Concrete | Chemical Contact xcessive Noise | ЗН | - Keep a first aid kit readily available at the site for potential injuries or chemical exposure. | 2M | |
| | | | - Use mechanical mixers in well-ventilated areas or outdoors to limit exposure to dust. | | |
| | | | - Store and dispose of all chemicals associated with concrete mixing safely and according to manufacturer guidelines. | | |
| | | | - Conduct regular checks of machinery to ensure it's functioning correctly and safely. | | |
| | | | - Maintain clear communication amongst the team about potentially hazardous situations. | | |
| | | | - Limit worker exposure time in noisy environments by enforcing rotation duties, giving adequate break times. | | |
| | | | - Implement a regular training schedule for all staff members regarding safety measures and hazard recognition to refresh their knowledge and keep them updated. | | |

SIGNATORIES OF THE SAFE WORK METHOD STATEMENT

The signed and dated personnel listed below have cooperated in the consultation and development of this Safe Work Method Statement which has been approved by the Person/s Conducting a Business or Undertaking (PCBU). In signing this Safe Work Method Statement each individual acknowledges and confirms that they have read this SWMS in full, having raised any questions for items on this Safe Work Method Statement that require clarification, and confirms that they are competent, skilled and knowledgeable for the task assigned to them. Every person acknowledges that they have received the relevant training and qualifications where required, before carrying out any work contained in this Safe Work Method Statement. By signing this Safe Work Method Statement each individual agrees to work safely, to follow any safe work instructions which are provided, and agrees to use all Personal Protective Equipment where appropriate.

| | Tollow any Sale work instructions which are provided, and agrees to use all reisonal riotective Equipment where appropriate. | | | | | | | |

| | | SAF WC A 5 | THUD STATEMENT | MONITORING AND I | REVIEW | | | |
| The SWMS must be reviewed regularly to reak sure it remains effective and must be reviewed (and revised if necessary) if relevant control measure are required by the operation consultation with workers (including contractors are subcontracted) who may be affected by the operation of the SWMS and their health and safety representatives who researched that work group at the workplace. When the SWMS has been revised the PCBU must ensure that all persons involved with the work are advised that a revision has been made and how they can access the revised SWMS, including all persons who will need to change a work procedure or system as a result of the review are advised of the changes in a way that will enable them to implement their duties consistently with the revised SWMS. All workers that will be involved in the work must be provided with the relevant information and instruction that will assist them to understand and implement the revised SWMS. | | | | The SWMS must be monitored regularly for the effectiveness of ensuring hazard controls are effective in reducing the risk of incidents, keeping the workplace safe for all personnel. The person responsible for monitoring the effectiveness of the Safe Work Method Statement should employ a multi-faceted approach which includes but is not limited to: 1. Spot Checks. 2. Consultation with workers, contractors and sub-contractors. 3. Internal audits on a continual basis. An approach of continuous improvement, promptly recording inconsistencies or deficiencies, followed up by immediate corrective action and consultation with all relevant personnel ensures that the PCBU is consistently developing ever-improving systems of safe work principles. | | | | |

SAFE WORK METHOD STATEMENT REVIEW CHECKLIST

This Safe Work Method Statement Review Checklist is to be followed and used upon initial development of the SWMS to help ensure that all steps have been adequately taken before work commences. Think of this document as an internal audit review checklist before commencing work, and may form part of a Toolbox Talk (safety meeting) and may be used as an opportunity for education and training.

| ITEMS WHICH MUST BE INCLUDED IN THE SWMS | COMPLETED | TO BE DONE | COMMENTS |
|---|-----------|------------|----------|
| | | | |
| The company details have been entered, including the project name and address. | | | |
| Names and signatures of all relevant personnel consulted during the development of the SWMS. | | P | |
| Name, signature, position and date signed of the person approving the SWMS. | | | |
| Specific personnel and qualifications, experience is noted in the SWMS. | P | | |
| Provides a step-by-step process of tasks required to carry out the activity or task. | | | |
| Adequate risk assessment of any identified hazards has been completed. | | | |
| Foreseeable hazards are identified and documented for each step. | | | |
| Any hazards listed in any site risk assessments have been added to the SWI | | | |
| SWMS initial risk (IR) column as well as residual risk (RR) columns completed. | | | |
| Check control measures added to the SWMS are the most effecting secutions. | | | |
| Responsible person is assigned and listed on the SWMS for the imperent of contameasures. | | | |
| Permit requirements specified, such as Hot Work, Electrical Work, Vocat Heights etc. | | | |
| SWMS identifies plant and equipment to be u d. | | | |
| Details of inspection checks required for any equipment listed at noted on the SWMS. | | | |
| Describes any mandatory qualifications, experience raining skills required to perform the work. | | | |
| Applicable personal protective equipment is selected on the SWMS. | | | |
| Lists any required permits or licenses. | | | |
| Reflects and documents any legislative references and/or Australian Standards. | | | |
| Identifies any hazardous substances used with specific control measures in line with any SDS. | | | |
